# The Journey to a Modern Enterprise

The Journey to a Modern Enterprise is our proven approach to moving customers to Azure. **Azure Foundation** is an offering which is part of this approach, built from many years' experience of moving customers to the cloud.

Moving applications and workloads to the cloud is a massive attraction for many organisations, primarily due to the favourable economics which the cloud offers, the ease of deployment, and the flexibility and scale that the cloud provides.

Microsoft Azure is a leader in the cloud space and continues to grow year-on-year in both general usage and with the new services that are introduced on a regular basis.

**Azure Foundation** from **Servent** solves some of the biggest challenges which organisations face when operating in Azure, namely: security, governance and cost management.

# What is Azure Foundation?

**Azure Foundation** from **Servent** is a comprehensive set of security, governance and cost management solutions for Azure. This offering is built on the **Microsoft Cloud Adoption Framework (CAF)**.

These solutions ensure that when you migrate workloads to Azure that they will be appropriately secured, have robust governance and will be cost optimised.

Moving applications and workloads to the cloud is a massive attraction for many organisations, primarily due to the favourable economics which the cloud offers, the ease of deployment, and the flexibility and scale that the cloud provides.

# Our Approach

**Azure Foundation** from **Servent** solves some of the biggest challenges which organisations face when operating in Azure, namely: security, governance and cost management.

The three key pillars of the **Servent Azure Foundation** offering are shown below.

## Azure Security

Ensuring the security posture of your Azure presence: identity management, infrastructure, connectivity, applications and data.

## Azure Governance

Managing, monitoring and auditing the use of Azure resources to meet the goals of your organisation.

## Azure Cost Management

Providing mechanisms to analyse cost, create and manage budgets, and act on best practice recommendations.

# Why **Servent**

An agile partner who can mobilise in days and not months, with the skills and experience to deliver digital transformation for all businesses.

## **100% Azure Focused**

As a leading UK Microsoft Partner and early adopter of Azure, we cover the full breadth of Azure services in depth, due to our 100% laser focus on the Azure platform.

## **15 Years' Experience**

We've been with Azure since the beginning, with 15 years' experience we offer unparalleled expertise and help some of the biggest enterprises in their adoption of the Azure platform.

## **Enterprise Scale**

Our extensive experience with some of the largest enterprise customers enables us to bring enterprise scale thinking to businesses of any size through our Enterprise Cloud approach.

## **Demystifying the cloud**

We work with customers of all shapes and sizes across many industry verticals and help them better understand the Azure platform and how it can transform their Business

# Benefits

**Servent's Azure Foundation** offering enhances your cloud journey with robust security, effective governance, and cost management. It ensures your cloud services are secure with advanced threat management and identity controls, while also providing effective governance to keep resources compliant with corporate standards. The cost management feature helps you plan, predict, and optimise cloud spending. Additionally, it offers a scalable and resilient infrastructure with comprehensive backup, disaster recovery, and monitoring capabilities, ensuring high availability and protection for your applications and data.

 Enhanced Security

 Effective Governance

 Cost Management

 Scalable & Resilient Infrastructure

# Azure Security

## Security

Azure Security will provide you with the confidence that you are consuming cloud services in a safe and secure manner. Your security posture in the cloud should always be top of mind. Our secured identity offering is built upon the following:

 Identity management best practices

 MFA & password management

 Role-based access controls

 Suspicious activity monitoring

 Just-in-time access

# Azure Security

## Infrastructure

Infrastructure is at the core of Azure. With our secured infrastructure approach, we implement the following:

Infrastructure design

Connectivity

Platform security controls

Advanced threat management

Resiliency & high availability

# Azure Security

## Applications and Data

Applications and data are the heartbeat of any organisation. It's vital that both are safeguarded and secure. We provide the following services and capabilities:

 Highly available cloud platform

 Safeguarding sensitive information

 Backup and DR

 Encryption

 Monitoring

# Azure Governance

## Governance

Azure Governance will help you understand how to effectively manage and consume Azure services. As part of this governance offering, we help identify define baselines and implement policy definitions. With Azure Governance we help you with the following:

Build repeatable deployment patterns

Create hierarchical management groups for better management

Introduce policies to enforce different rules and effects over resources, so those resources stay compliant with corporate standards

# Azure Governance

## Cost Management

When organisations move to the cloud a common challenge is ensuring that costs are effectively controlled. With Azure Cost Management we help organisations plan with cost in mind.

We can help you better understand cost analysis, budgets and use Azure more efficiently. We can help you with the following:

Have better predictability of up-front costs

Understand Azure costs prior to any migration to the cloud

Be alerted to where your organisation can save on cloud spend and get more for less
