

Sentinel Automation Services

[Read more on ManaJing.com](#)

Description

- Automated incident response procedures
- Integration of threat intelligence feeds
- Testing and optimization
- Collaboration and customization
- Ongoing support and updates

Requirement Gathering and Analysis:

- Conduct a thorough analysis of your security operations requirements, identifying key processes and potential threats.
- Schedule a requirement gathering workshop to define objectives and gather necessary information for playbook development.

Tailored Sentinel Playbook Creation:

- Develop customized Sentinel playbooks that automate and orchestrate security incident response actions based on your organization's specific needs.
- Collaborate with our experts to design and implement Sentinel playbooks aligned with your security workflows.

Integration and Optimization Support:

- Provide integration support to seamlessly integrate Sentinel playbooks with your existing security tools and systems.
- Engage in integration workshops and receive optimization recommendations to enhance the effectiveness of your custom Sentinel playbooks.
