

Copilot for Security Readiness Assessment

Value proposition

Generative AI for Modern Security Operations - Grounded in identity, security, compliance, and management data, Security Copilot is designed to help organizations unleash creativity, reduce the MTTR, and level up skills. With this readiness assessment, customers will work through various demos on copilot in action, relevant user scenarios challenges and pain points to identify top prioritized scenarios for their Security Operations.

Workloads

- Microsoft Copilot for Security
- Microsoft Entra
- Microsoft Defender (all-up)
- Microsoft Purview (all-up)
- Microsoft Sentinel
- Microsoft Intune

Engagement Outcomes

- Identify technical requirements for Copilot for Security
- Identify participants for Copilot for Security
