

Digital Workforce

A Readiness Management & Adoption Program

What is Readiness Management?

Readiness Management

Readiness Management is the application of standard processes and tools for leading the people side of change. It's the way in which we prepare, equip, and support individuals to successfully adopt technology and prevent disruption.

Prepare End Users

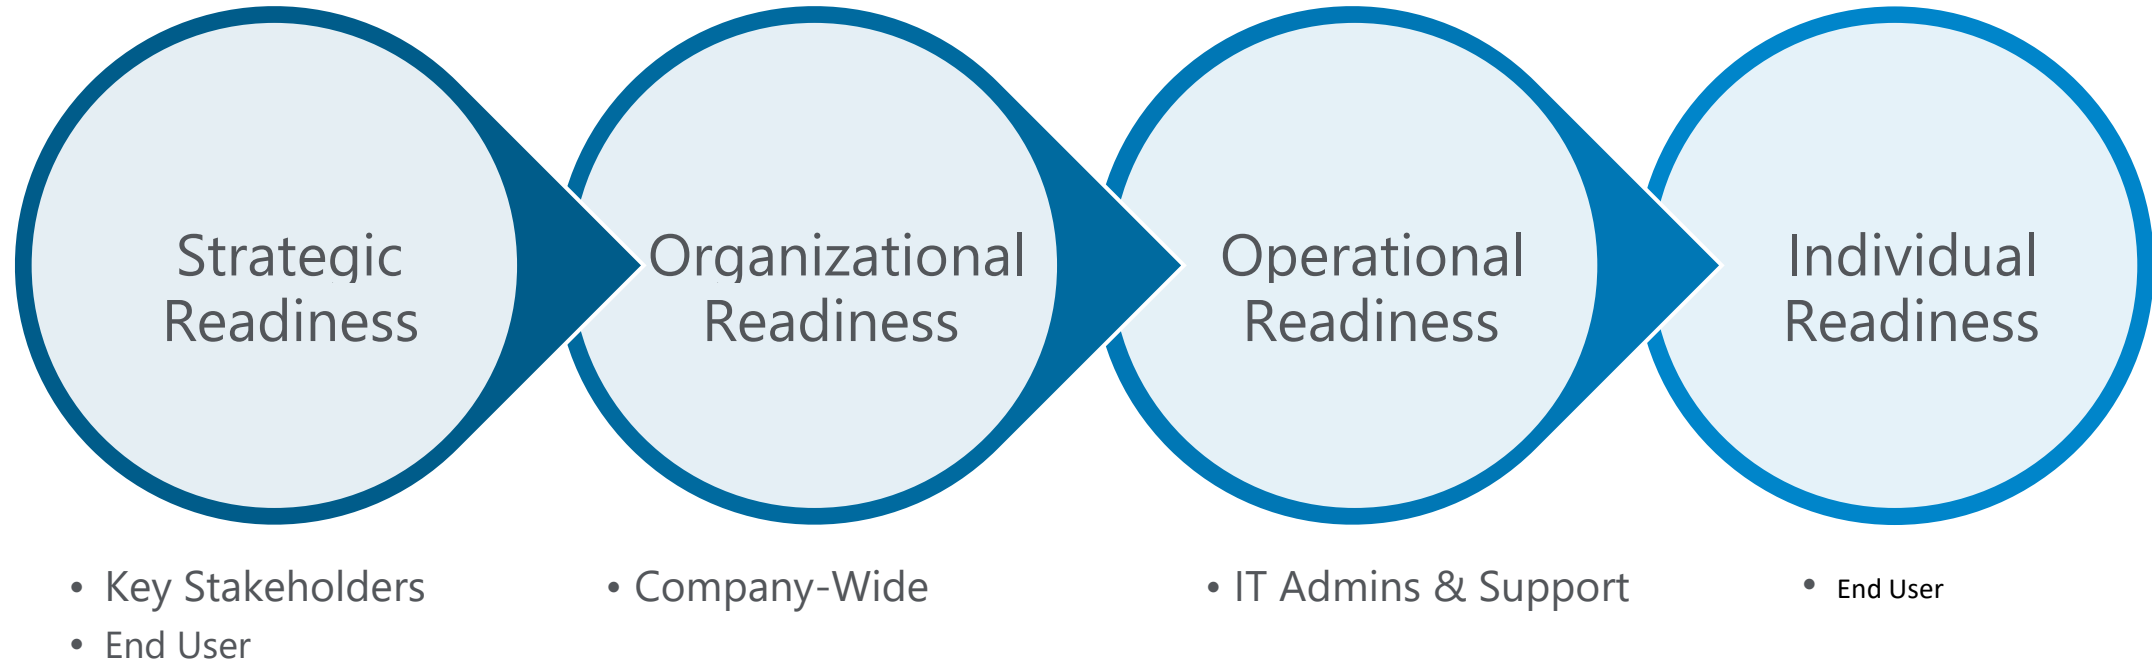

Increase Adoption

Drive faster ROI

Dimensions of Readiness

Why Readiness Management?

- Prepares your workforce for upcoming changes
- Optimizes end user adoption and usage
- Mitigates project risk and resistance
- Drives faster ROI
- Ensures a project achieves intended outcomes
- Makes IT initiatives more successful

Readiness Managers

Readiness Managers are dedicated to helping IT staff and end users prepare for change.

They're the liaison between the technical project team and those impacted by upcoming changes.
