Copilot Studio Hackathon: 1 Day Copilot Studio Enablement Hackathon

Pragmatic Works Training , Inc.

Copilot Studio is Microsoft’s platform that allows users to create and manage AI-powered copilots, also known as chatbots or virtual agents. During the 1 day (8 Hour) Copilot Studio hackathon, an expert trainer from Pragmatic Works will guide your team of up to 10 students in using Copilot Studio to create your own low-code generative AI copilots that will solve a specific use case / business challenge. This hackathon is equal parts training and solution development with a goal of “Making it Real!” while students learn the skills for sustained development and adoption.
