

Power Platform Services

TietoEvry Tech Services

Copilot Studio

We help you build custom bots, extend copilot capabilities and data sets and make AI available to your users

Power Pages

Design and deliver responsive, advanced and secure low-code websites

Power Automate

Create flows, custom connectors, design and implement solutions according to your specific needs

Power Apps

Advise on and analyze your needs, connect to data sets, automate processes and design and deliver custom applications

What we bring to the table

A team with a mix of youth and seniority, ready to both advise on and implement solutions covering all parts of the Power ecosystem.

We help you understand business needs, design solutions that fit those needs – and give them life.

A flexible delivery model where we can take charge of the entire process or deliver completely on your terms, alongside inhouse consultants.
