

Project management done brilliantly

Keep up with projects whilst staying profitable

The simple, powerful way to track materials and resources from quote to project completion

Streamline your workflows. Generate precise project quotes based on materials, time, and costs. Organise, prioritise tasks, and track progress from quote to completion. Record project materials instantly for accuracy. Maintain excellent customer service by informing customers of progress.

Track performance and progress. Get real-time project cost and profitability information from project inception, monitor progress with detailed reporting, allocate resources based on cost and availability, and track actual versus planned costs to avoid budget overruns and delays.

Manage projects, resources, and materials. View, describe, prioritize, and assign tasks with target dates in one place. Submit time, materials, expenses instantly. Receive alerts to avoid missing deadlines. Invoice regularly for healthy cash flow.

Real time reporting. Stay updated on project details instantly with the Dashboard, comparing planned and actual costs. Access various reports, track materials and expenses per project, and use Tidy anytime, anywhere as it is 100% cloud-based.

Powerfully simple. A simple, intuitive tool requiring minimal training, scalable for growing teams, accessible across devices, and cost-effective with customizable pricing plans.

Integrate with useful apps. Streamline invoicing and enhance cash flow with Xero. Integrate Microsoft Office 365 tools for improved collaboration. Utilise EzzyBills to scan and extract data from documents, reducing errors and saving time on expense management.

Delightfully Simple

Hear why our customers love TidyWork

The dashboard gives engineers and project managers a better idea of what is going on and how efficient their projects are. I can keep an eye on each job individually, and know constantly whether we are in profit, and if not, why not.

Gillian Walker

Crouch Waterfall

Before we started using TidyWork and Xero, we used a software program to help us keep track of costs, but that soon got old, so we wanted something more modern and user friendly. With a cloud-based system, you always have access to the latest version. And it's handy to have a quick look at what's going on if you're travelling overseas.

Peter Evans

F.V. Evans & Sons Ltd.

I've done half a dozen quotes using TidyWork and we have won all of them. I can't believe how long it used to take before. We get a better breakdown on our projects – nothing is hidden. Our biggest dairy client Fonterra (the world's biggest dairy products exporter) says our quotes are leading the way amongst their contractors.
