

NECTOSOFIC FABOR OF C

The Data Platform for the Era of Al

ROI Of A Modern Data Platform

Annual increase in customer satisfaction

Year-over-year growth in annual company revenue

Annual increase in average customer spend

Annual growth in crosssell / up-sell revenue

What's The Benefit Of Microsoft Fabric?

A "SaaS-ified" Data Platform

Fully integrated data analytics platform

A turnkey analytics platform, including data engineering, machine learning, operations, and analytics with minimal infrastructure setup.

One Security Keep your data secure

Granular security defined once, including column-level security, row-level security and data masking.

Security definitions flow through the entire Microsoft Fabric ecosystem.

Copilot & Generative Al

Al elevates your analytics

Notify key business stakeholders when data breaches a predefined threshold.

Describe reports in your own words, and Copilot will quickly create them in Fabric.

interperiment ed7e-54ba-a03f

Fabric provides:

- Single source of truth for your data domains means you no longer need to pay the 'integration' tax.
- Seamless integration and interoperability between data engineering, data science, and reporting / visualization tools.

SaaS-based environments removes the burden of complicated data platform architectures.

Adaptability

Fabric provides:

😡 🥖 Kely edited

Illimago .

- Lakehouse architecture provides a flexible analytics foundation.
- SaaS-based solution enables teams to quickly work within a fullyintegrated environment without the burden of complex data platform architectures.

Usability

Fabric provides:

Quickly onboard new teams, users and domains through a permissionbased user interface.

Copilot / Generative AI experiences for building data pipelines and reporting solutions.

Persona-based tools for tailored experiences targeting administration, data engineering, data science, business intelligence & reporting.

Security & Governance

Fabric provides:

- One Security provides granular security controls for column and row security.
- Deep integration with Azure Preview for data governance and protection.
- User administration around organizational workspaces and data domains.

Cost Management

Fabric provides:

 Match your scale and tooling with the needs of your organization through flexible licensing.

 SaaS platform reduces the costs that come with building, operation, and maintaining complex data platforms.

How To Get Started With Microsoft Fabric

STEP 2

ΓΙΟΙ

Experience the benefits and speed of a SaaS-ified data platform by building an endto-end analytics solution.

2-4 Weeks

STEP 3 **Roadmap & Next Steps**

Expand data analytics use cases, democratize your data, and address additional challenges and opportunities with Microsoft Fabric.

STEP 1 **Microsoft Fabric Workshop**

Gain a full understanding of **Microsoft Fabric and it's** capabilities, explore salient use cases, and define a plan for a pilot engagement.

Whether you are just beginning your Digital Transformation with Microsoft or are years into it, our cloud consulting team can advise a strategic roadmap to modernize and transform your business. This team has extensive expertise in cloud migration, app modernization, data platforms and analytics, and cloud native development.
