

INVENTORY CONTROL AND VISIBILITY MADE MOBILE

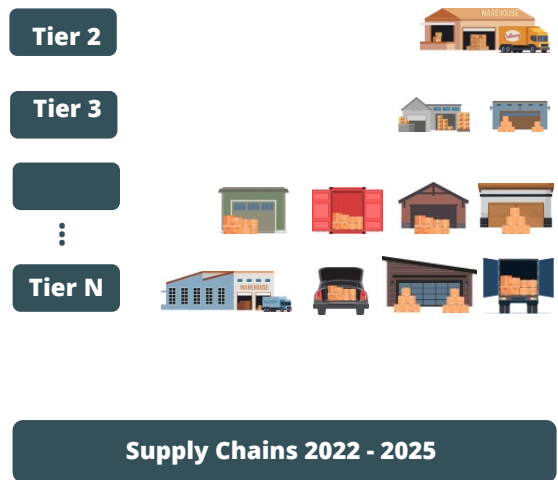

THE CHALLENGE: SUPPLY CHAINS HAVE SHIFTED

Today more than 30% of inventory is stored in tier 3 – N locations, beyond organizations' span of control. By 2025, this will be 50%. Fragmented, undigitized, and stored everywhere.

If you can't see it, you can't fix it.

So if you're lacking control of your field and remote inventory as your ERP and WMS solutions are too rigid to be deployed to Tier 3 – N locations, Ventry is your solution.

Ventry is trusted by industry leaders

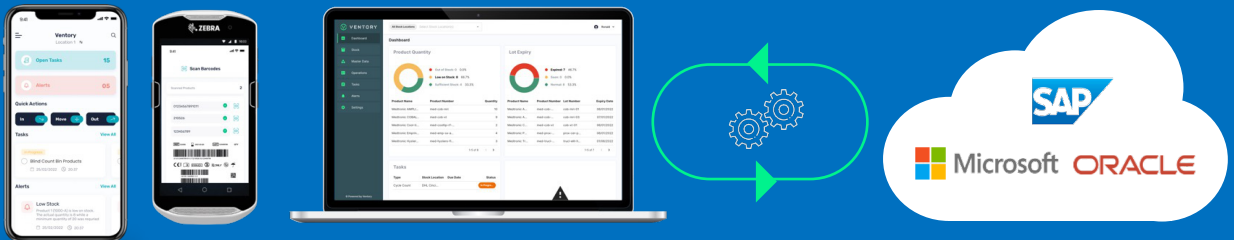

RECLAIM CONTROL OVER YOUR FIELD INVENTORY

Lack of visibility and siloed inventory data that leads to faulty business decision making. Managing data becomes guesswork.

Ventory is a smart extension for your core systems so that you can digitize, automate and reclaim 100% control over your field inventory... wherever it is.

VENTORY solution:

- Contains AI to enable multi barcode scanning
- Is simple to use and easy to deploy
- Works on ANY device including Zebra, iOS and Android – both online and offline
- Integrates to your systems via standard API & enables single sign on

ENTERPRISE SOFTWARE PLATFORM

+ MOBILE APP

+ API CONNECTOR

KEY RESULTS: DEMONSTRATED ROI

Increased liquidity

Reduced wastage

Reimagined efficiency

Eliminated shrinkage

Improved customer experience
