Realize Value

Overview and Pricing: $6,900.
- The evolution of Search
- Copilot for web Skills for Employees
- Microsoft 365 License requirements Review

Finchloom is a Microsoft Solutions Partner specializing in cloud solutions and services. We implement solutions that enhance your work experience by improving productivity, collaboration, and security within Microsoft 365 and Azure.

Microsoft Search is a customized search engine to find work related information across the Microsoft 365 apps, such as SharePoint, OneDrive, Outlook, and Teams, that integrates with many popular 3rd party services, web search, and Windows search, giving us a unified and seamless search experience from any device or browser.

Microsoft Copilot for web is a conversational AI platform that allows users to interact securely with the web, Microsoft 365 apps, and data using natural language; and is used by asking questions to get answers, perform tasks, and access information using chatbots that are powered by Microsoft's cognitive services. Copilot can be integrated with Edge, Teams, Outlook, SharePoint, and other apps, creating a smart and engaging way to work.

Setup and Configuration:
- Ensure proper identity and access permissions
- Connect to your Microsoft 365 Data for Search
- Protect Business Data from entering public chat

Teach Your Users:
- Entry level AI for all employees
- Prompt Engineering
- Using Text Generation and Document Analysis
- Start using Microsoft 365 Feed and search across Microsoft apps
