

Swift Azure Landing Zone deployment: Right from day one

A pre-engineered ALZ solution, rapidly deployed to your tenant. Enterprise-grade, secure, compliant, automated and right first time.

SOLUTION OVERVIEW

BlakYaks' Accelerator Pack for Azure Landing Zones expedites the deployment / enhancement of customers' ALZ to deliver enterprise-grade standards. Whether greenfield or a re-design of an existing ALZ deployment, our delivery squad will work with your own team to swiftly deploy or upgrade your ALZ.

Using a battle-hardened code base (IaC), we deliver a platform that's integrated into mature DevOps pipelines, entirely automated, secure and reduces operating costs long term. At the end of the project, you will have rock-solid Azure platform foundations ready to host all production services and sets the standards for all cloud service deployments and management moving forward.

Production-ready Azure Landing Zone

Fully prepared to receive your most critical business services. Supporting the full automation of new and migrated services and workloads.

Enterprise design & strong standards

A design and code base (IaC) honed over many years delivering Azure Landing Zones to customers with the highest design & security standards.

Expert team

Our implementation squad delivers quality outcomes swiftly, followed by handover to your operations team or ongoing support from BlakYaks SpecOps.

BENEFITS TO YOU

- ▶ Enterprise quality design you can trust, compliant with best practice and delivered rapidly
- ▶ A fully automated ALZ deployment that sets standards for all future services and workloads
- ▶ Highly observable and manageable ALZ, minimising management overheads and costs
- ▶ Strong DevOps & IaC methods at the kernel of the ALZ deployment
- ▶ Secure, compliant Azure platform

SUITABLE FOR YOU IF

You want to optimise and modernise your Azure platform

You aim to move from legacy data centre or cloud environments

You want to employ modern cloud native tools, methods, and standards

You are concerned about inherent risks or gaps in your current deployment

WHAT TO EXPECT

Onboarding
