Azure Foundations Assessment Offering

The *'Azure Foundations Assessment'* is a broad review of the customer's datacenter environment providing cloud readiness, prioritization of workloads for migration to Azure, detailed cost consumption estimates and recommendations for Governance.

Customer Profile

Customer Profile: Customer knows they want to move to Azure, but don't know where to start.

- Additional Qualification Criteria:
    - Existing Azure customer
    - Ability to migrate: BANT
    - Dedicated project lead
    - Sign off on project timelines
    - Deploy appropriate platform/tool

Delivery and Scope

Engagement Description:

- Tool-driven, broad data collection and DC analysis
- Focus on cloud readiness analysis including:
- Categorization of all in-scope servers by workload type
    - Prioritization workloads and applications as candidates for Azure migration
    - Financial Business Case
    - Analysis & Recommendations for key CAF Governance principles (Security, Identity, Resource, Cost, Deployment Acceleration)
- Proposal for next steps

Deliverable Includes

Insights, analysis and a recommendation for moving to Azure with:

- Executive Summary
- Customer Business Objectives
- Project Scope
- Cloud readiness report *(Compute, Storage & Network)*
- Identification and prioritization of candidates to move to Azure
- High-level Financial Business Case (PAYG, AHB, RI, over time)
- CAF Governance Analysis & Recommendations

*Estimated duration 3-7 weeks.
**No charge to customers provided by Microsoft Funding Partner Program
