Summer School With Classera
Learning Never Stops" initiative"

Future Gate Project Outcomes

01 Improving Learning Outcomes

The Classera System provides a wide range of educational services for all elements of the educational process that improve education outcomes as the system provides the following services:

Personalization of Education

The ability of individualizing education where the teacher can direct different sources to each group of students according to their skills, needs, and their inclinations for educational methods.

Smart Mate

The Smart Pal service, which uses the Artificial Intelligence to know the standards that the student failed in and then apply the system without the teacher's intervention suggests educational resources and multiple tests for the student to improve their level in those standards they failed in.

Virtual Classrooms

The Virtual Classrooms service allows the teacher to give lessons in a fully electronic form and it allows the students to attend their classes and continue their learning if they failed to come to schools, to maintain days of actual education during the school year to cover the entire curriculum. Also, teachers can use this service to broadcast student booster classes remotely outside official working hours, which reduces the expenses of private lessons for the parents and raise parents' satisfaction with the services provided by the Ministry in the care of their children.

Digital Resources

A huge resource library that allows the student to benefit from the lessons of the best teachers of the region or country or the Middle East.

Virtual Labs

The Classera system provides a range of virtual labs that enable students to conduct experiments away from the risks and the costly material needs of each experiment.

Educational Supervision

Enabling the educational supervision of the Ministry to follow up and evaluate the classes of larger numbers of teachers through evaluating the contents, preparing lessons and students' interaction with resources and others evaluation tools, and placing them in an online assessment that reflects the efficiency of teachers.

Learning through Gamification

The existence of motivation systems for students and achieving the concept of learning through play is one of the most important measures that contribute to improving students learning and achieving justice in the motivation system so that all students are honored according to their efforts and interaction with lessons and educational contents.

Providing Electronic Testing System

The system provides multiple types of evaluation methods where the high reliability in online testing in terms of supervision, test management instantaneous analysis of the test after the end of the test.

02

Reducing Training Expenses

The System enables all the elements of the educational process to train remotely & save travel & accommodation expenses, also the system provides a specialized platform that contains many recorded and live courses so that the trainees can raise their efficiency according to their needs and time.

03

Raising the Efficiency of Teachers

Classera Online tools help teachers to compete among themselves to improve the learning outcomes of their students, with online platforms documenting teacher's work, the educational supervision can increase teacher's efficiency according to their needs.

04

Providing Data & Information Bank

The Classera System provides data and information for each level instantaneously and in a distinctive manner enabling the Minister of Education with a click of a button to know the levels of the students according to the local standards and then plan and make appropriate decisions.

05

Providing Multiple Sources of Income

The Classes System provides a set of programs and services that organize all the administrative processes and save time and effort, where online payment can be made within the platform for all the educational needs from books, uniforms, and other needs which saves effort and time. Also, other services are available such as the Edumalls, which enable the students to shop online for all their school needs, saving time and effort.

06

Ensuring Education Equity

All educational services are available everywhere and anytime. It allows students to repeat the lesson more than once according to their different abilities, and this provides education equity for students to learn outside the classroom, which is ruled by class time. The system also enables the individualization of education according to the needs of each student. It provides multiple resources for students from teachers at the state level so that the students can benefit from the most distinguished teachers and their resources.

07

Providing Book Printing & Fast Updates

One of the most important advantages of the educational system is the possibility of making textbooks available online in a non-printed form which saves huge printing expenses, and it also makes it easier to fix and update the errors of these books quickly.

08

09 Providing a Safe Environment

The system presents a range of services that provides a safe environment for students which are:

Online Paging System

Where the student can only leave the school with a request from the guardian or the person authorized by him, and this provides the highest levels of safety for students by being inside the school and only leaving with a quick online request from the guardian.

School Bus Tracking System

The system allows each school to build an economical route for its buses and provides a safe environment for students and allows the parents to track their kids and know the full details of the trip.

School Canteen System

Where the parents can charge the student's balance and not give him any cash, thus ensuring that the student only buys from the school restaurant according to the healthy options set by the guardian. It limits the risk of cash in the hands of the students and losing it or using it in inappropriate way.

Health Clinic System

A health file is available for each student enables each school to make the right decisions in physical education and enables the parent to see all the medical services provided by the school, since all our systems are interconnected under one system, the parent and the doctor can prevent some food items from the school restaurant system to ensure the student's health and provide a safe environment for him.
