

CASE STUDY

Professor Chinedum Peace Babalola, Vice Chancellor of Chrisland University, Abeokuta has disclosed that the institution is taking the lead in providing quality and value to teaching, learning and assessment using the Classera platform. The use of the platform to conduct the online examination for the students of the university has added quality and value to the university's method of assessment which is founded on integrity.

The professor further stated that the university had studied other possible online assessment methods and discovered gaps which were well taken care in Classera.

"The University found Classera Learning Management System to be robust enough to handle learning and assessment with emphasis on the examination integrity"

Prof. Chinedum Peace Babalola

CHALLENGES BEFORE CLASSERA

- Tracking students' progress and attendance
- Online assignments
- Exams proctoring

SOLUTION

Classera has helped to track students' attendance, submission of assignment, plagiarism tracking, among others in 2020, 2021 and 2022.

It helped to expose students and lecturers to richer resources online including information from Ivy League Institutions.

The University is still combining e-learning with classroom learning for effective learning experience.

with the successes recorded with the use of the platform, Chrisland University has taken a giant leap ahead of many other institutions in utilising technologies for the delivery of teaching, learning and assessment.

"Chrisland University is committed to promoting competence and confidence to engage in new technology-driven approaches which is why we constantly coach our members of staff to meet the continuous advancements of the e-Learning facilities in order to maximize quality education in Nigeria."
