

Solution Assessment: BizTalk to Azure Integration Services Migration

BizTalk to Azure Integration Services Migration

A three-week assessment for analyzing existing BizTalk integration middleware. Collect use cases and recommend which Azure PaaS components and Azure Integration Services that should replace the existing BizTalk integrations and Adapters. The outcome of the assessment is a roadmap and estimates for migrating BizTalk to Azure.

Outcome:

- A recommended reference architecture
- A backlog of use cases
- A project plans
- An estimate for establishing the new target Azure integration platform
- Recommendations for which integrations to start with based on best practices for integration migration
- An offer for conducting the establishment of a new platform and the migration from BizTalk to Azure
