Are you familiar with these challenges as IT manager?

- Are your IT costs rising due to inefficient resource use?
- Are your assets recorded in Excel spreadsheets, making maintenance difficult?
- Do you struggle to find relevant device information when incidents occur?

Access cost-effective IT budget planning with Asset Management – a secure single point of truth providing accurate data and audit trails to ensure asset accountability. No more lost or idle assets in storage. decision-making and facilitating communication with top management.

CMDB Diagram

Curate data from multiple sources to get a comprehensive, unified map of your IT infrastructure, ensuring security and faster incident resolution with ALVAO's Configuration Database.

Inventory Audit

Accelerate your audit with our web inventory, reducing the timeline from weeks to a few days. Receive employee notifications where you can view an overview of all assets they are responsible for.

M365 Optimization Report

ALVAO helps you optimise your Microsoft 365 spend by connecting administrators with usage data, identifying cost saving opportunities such as disabled or inactive users and double-licensed users. Licence optimisation can reduce costs by up to 30%.

All devices in Intune under your control

Connect ALVAO to Microsoft Intune for real-time information on all devices, including computers, iOS or Android mobile phones, and smart devices.

HW & SW Discovery

Automatically detect active devices via TCP/IP, wherever they're located, without overloading or slowing down servers.

Integrate your business apps with REST API

Integrate Asset Management with third-party applications like ERP and IT infrastructure monitoring tools to expedite data sharing, reduce processing time, and optimize your infrastructure.

Discovery Agent

Utilize our Autonomous Agent and Agentless Asset Discovery to detect computers (Windows, Linux, macOS), printers, monitors, servers, switches, and more, both within and outside your network. With automatic detection running in the background, there's no need to initiate searches – leave it to us.

Manage your IT assets with SCCM integration

Enrich ALVAO data with SCCM records. Get more detailed insight into the usage of devices, software, and cloud resources.
