

POWER PLATFORM CO-MANAGED SERVICE

Leverage Power Platform to its full potential with Imperium Dynamics
Power Platform Co-Managed Services

Overview

While an in-house Power Platform team, including developers, business owners, and administrators, is essential for day-to-day operations, it's recognized that some complex issues and enhancements may require additional expertise. Understanding these complexities involved in effectively managing your Power Platform solutions, Imperium Dynamics is here to support your team with our Power Platform Co-Managed Services.

System and Administration \$3,000* /month	Application Accelerator \$10,000* /month	Beyond Power \$20,000* /month

Why Go For Co-Managed Services

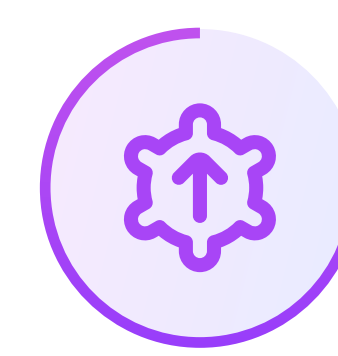

Technical Expertise

We specialize in managing Power Platform environments, handling data effectively, and optimizing system performance. With Power Platform technical architects on board, we ensure seamless management and optimization of your platform, empowering your business for continued success.

Cost-Effective Alternative

Redirect your team's resources towards more strategic initiatives with our Co-Managed Support, instead of hiring a full-time technical and solution architect for periodic tasks. It's a cost-effective solution, but it does require some in-house Power Platform knowledge, offering you control with assistance.

Governance and Continuous Improvement

Our support services are designed to assist with governance and drive continuous improvements within your Power Platform ecosystem. With Development and Support Credits/hours, you can access our expertise for a range of Power Platform needs, including customizations, app development, workflow automation, data integration, and security enhancements.

Power Platform Adoption Support

We understand the importance of your Power Platform adoption for your business success. Our support plan includes a Clarity monitoring setup for Model-Driven App to ensure smooth utilization of your Power Platform. We will take care of everything, from setup to configuration to ongoing support and maintenance. Our Power Platform experts can craft the perfect environment for low-code growth and maximum security.

Our Customers Using Co-Managed Services

* Discounted price if billed annually

** Support contains products bugs, platform issues, addressing critical downtime and investigation of customer issues

*** Development hours contain new feature requests, new reports and enhancements to the system
