

Enkay Pro for Azure Certificates & Secrets Tracking (CertWatch)

About CertWatch

CertWatch, Enkaytech's multi-tenant application, is your fortress against the perils of certificates and secrets expiry causing down time. Designed to empower Azure application registrants, it ensures you're never caught off guard by expiring secrets and certificates, keeping your applications running smoothly without interruption.

Our team uses CertWatch in our customer engagements to help maintain high availability of Azure applications we have built for them.

What CertWatch offers

- **Authentication and Authorization:** Secure user authentication using Azure Active Directory or other trusted providers, ensuring only authorized users have access.
- **Secret and Certificate Tracking:** Select and track secrets and certificates associated with your applications, with customizable notification preferences to keep you informed.
- **Application Registration Listing:** Fetch and display details of Azure tenant application registrations, providing you with a comprehensive overview of your digital landscape.
- **Email Notification Setup:** Receive timely notifications before secrets or certificates are about to expire, ensuring proactive management.
- **Search Feature:** Easily find specific applications or details using a robust search functionality, simplifying information retrieval.
- **Data Persistence:** CertWatch securely stores user preferences and application details, ensuring data integrity and compliance with data protection regulations.

What our customers are saying

As an IT manager overseeing numerous Azure applications is difficult, CertWatch has been a game-changer for our team. The automated tracking of secret and certificate expirations has eliminated the manual, error-prone process we previously struggled with. The proactive notifications have been invaluable, allowing us to renew certificates well before expiring, avoiding potential downtime. Highly recommend it to any organization looking to streamline their Azure management!

Director, Globco

Why choose CertWatch?

1. Automated Expiry Management: CertWatch eliminates the need for manual tracking of secrets and certificates, reducing the risk of human error and service disruptions. Automated notifications ensure you are always ahead of expiration dates, maintaining continuous operational efficiency.

2. Proactive Security Measures: It's regular updates of secrets and certificates are facilitated, significantly mitigating security risks. This proactive approach helps safeguard your applications from potential vulnerabilities associated with expired certificates.

3. Centralized and Efficient Management: Our App provides a centralized dashboard for managing multiple Azure applications across various business units. This streamlines administrative tasks, saving time and enhancing overall productivity.

4. Robust Search and Customization Features: The powerful search functionality lets users quickly locate specific applications or related details. Customizable notification preferences enable users to set alerts based on their specific needs, providing flexibility and control.

5. Seamless Integration and Data Security: Secure user authentication through Azure Active Directory and other providers ensures robust access control. CertWatch also prioritizes data integrity and compliance with data protection regulations, giving you peace of mind regarding your sensitive information.

We are...

A Microsoft Solutions Partner across multiple competencies is a testament to their exceptional expertise and unwavering commitment to providing top-tier services in the world of cloud computing, application integration, and development. Our impressive achievements such as a Digital and App Solution Partner, signify our unwavering commitment to excellence in the realm of Azure services.
