

WORKSHOP

GET READY FOR M365 COPILOT

ABOUT THE WORKSHOP

The era of AI is here, and it's time to understand how to make the most out of it! AI brings many opportunities, but it can also be confusing, especially if there is no clear strategy or guidelines for how to use it responsibly and effectively.

In this workshop, we discuss and discover the possibilities of AI and how it can accelerate your business and support your employees in their work. We focus on Microsoft 365 Copilot but do a short introduction also to other relevant AI tools. We mix theory with practical examples, so that your organisation gets the most out of the workshop.

The workshop is aimed at business decision makers, who are involved in digital and AI strategy. We will discuss for example use cases, technical prerequisites, data quality and training.

The outcome of the workshop is to leave your organisation with an understanding how Microsoft 365 Copilot can support your business and employees in their everyday work and what kind of action and preparations are needed to implement it successfully.

WORKSHOP DELIVERABLES

INTRODUCTION TO AI

An introduction of different available AI solutions, how they fit together in the context of digital workplace and how they can be used responsibly and effectively.

MICROSOFT 365 COPILOT

Introduction of Microsoft 365 Copilot with some practical examples. After this session you should understand what is Microsoft 365 Copilot, how it can complement your existing M365 tools and what value it brings to the business.

USE CASES AND PRACTICAL SCENARIOS

Together we will create some use cases for your organisation with examples and scenarios of Microsoft 365 Copilot, bringing value to your business and employees.

PREPARE FOR AI

We will assess how Microsoft 365 Copilot fits in to the Microsoft 365 ecosystem, and what organisations should do to technically prepare. We will discuss topics including data clean-up, document management and information protection.
