

The Future of Digital Workplace with Generative AI

Of enterprises will have used generative AI API models and/ or deployed GenAI-enabled applications in production environment, by 2026.1

Of high maturity digital workplaces will have leaders with a background in AI, data and analytics, versus infrastructure and operations.²

Of conversational AI offerings will be embedded with GenAI, by 2025.3

Microsoft's Copilot products impact not only digital workplace technologies but also multiple enterprise application areas. Digital workplace application leaders must be the focal point to evaluate, coordinate and prioritize all Copilot investments as part of a broader generative AI strategy.²

Microsoft 365 Copilot – Enterprise Ready Digital Assistant

₫	Grounded in your business data	Microsoft 365 Copilot has real-time access to both your content and context in Microsoft Graph.
C	Comprehensive security, compliance, and privacy	Copilot inherits your security, compliance, and privacy policies set up in Microsoft 365.
	Architected to protect data	Your data never leaves its secure partition, and it is never used for training purposes.
—	Integrated into the apps you use every day	Word, Excel, PowerPoint, Outlook, Teams, and more.
0	Individual user and admin always in control	User decides what to use, modify, or discard.
-+	Designed to learn new skills	As Copilot learns about processes, it can perform more sophisticated tasks and queries.

Turning Your Words into Actions

Ignite Innovation Harness Copilot's power so you never start from scratch **Boost Productivity** Let Copilot summarize actions for you, and Copilot for Microsoft 365 optimize your time **Nurture Expertise**
