

Digital Front Door

Reshaping the patient journey to access
healthcare services

Five Faces

Powered by DX5

We make complex simple.

5 Five Faces

Patient Engagement

Providing patients with a central 'hub' to request appointment changes, update details and language preferences, view information, complete forms and send messages.

5 Five Faces

Check-In

Catering to all abilities with mobile check-in and patient passports, self-service kiosks, or assisted check-in.

5 Five Faces

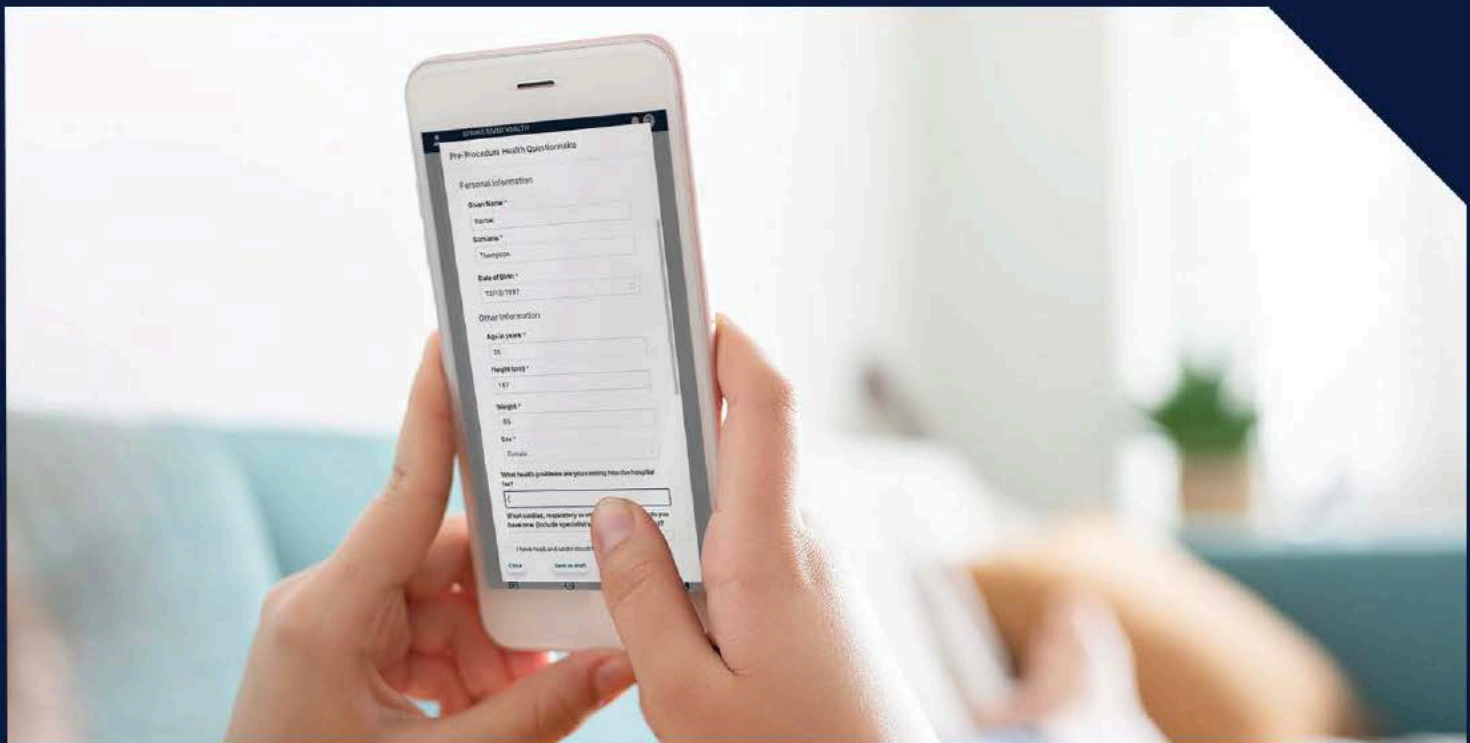

Queue Management

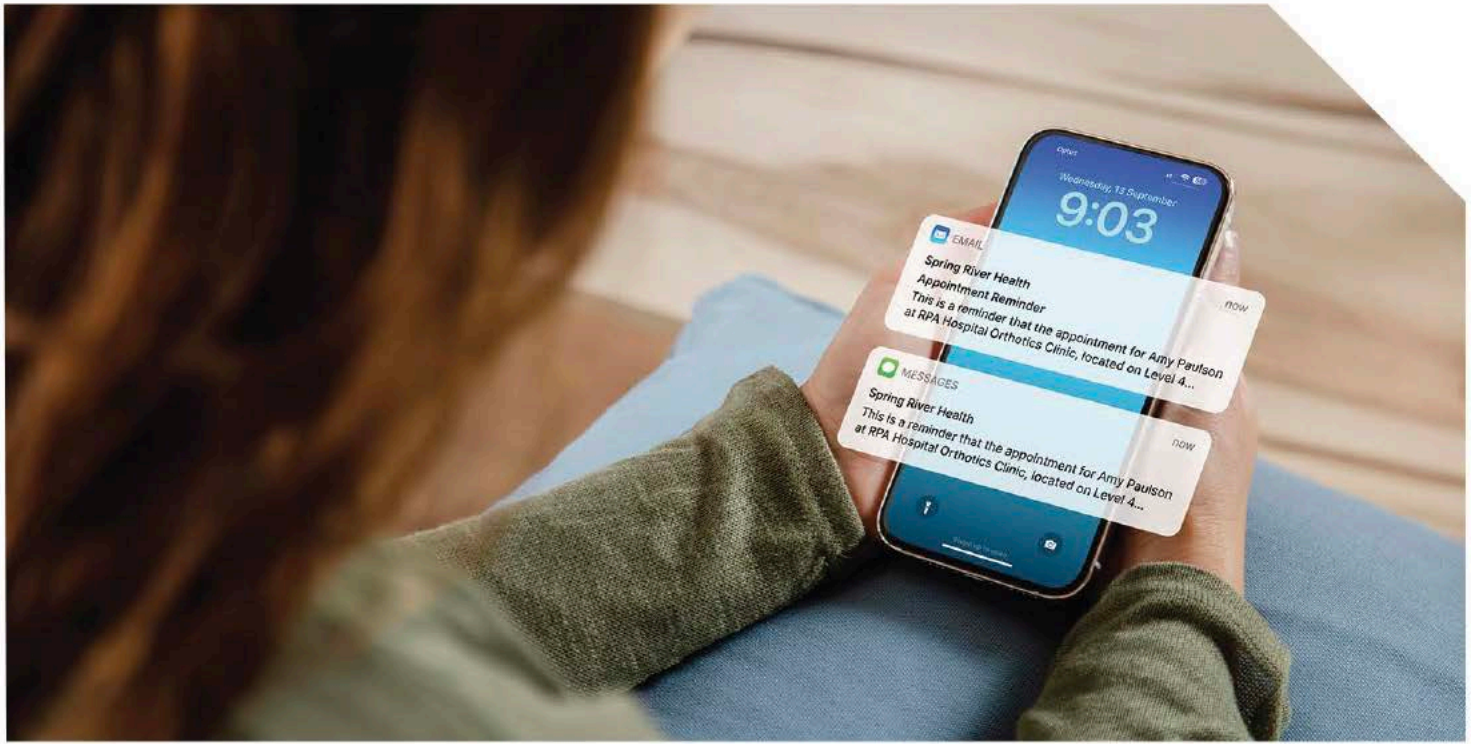

Improving patient flow and the wait experience while providing clinics with real-time visibility in one seamless solution.

5 Five Faces

Smart Forms

Digitising patient data collection to eliminate manual data entry, automate workflows, and take a 'tell us once' approach to data.

5 Five Faces

Comms & Notifications

Keeping patients informed throughout their health journey with reminders, secure messaging, updates and broadcasts.

Powered by DX5

Five Faces' Digital Experience Framework (DX5) is the low-code technology that powers these patient experience solutions, providing building blocks for consistent digital patient experiences and innovation.

The power of one

A single touchpoint for patients and providers

Configure and control

Rapid innovation without development

Built for scale

Deploy across different departments, facilities or regions

Building blocks

Modular solutions to support innovation
