

Digital Signage

PATIENT ENGAGEMENT

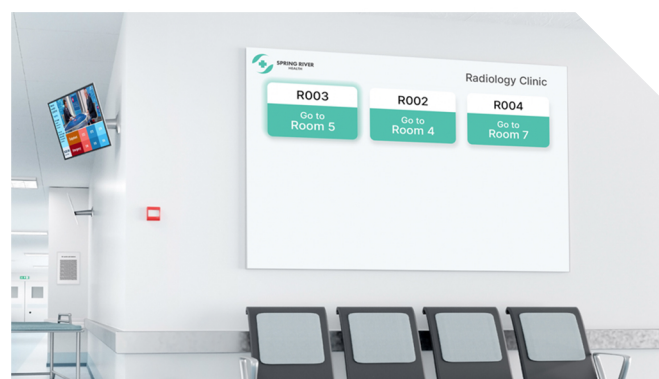

Digital signage plays a key role hospitals and health facilities – guiding visitors, informing patients, managing queues, and keeping waiting rooms calm. It provides critical touchpoints to improve patient engagement and reduce anxiety.

TRANSFORMING THE PATIENT EXPERIENCE

DIGITAL SIGNAGE

- ✓ **Publish content centrally** to a single clinic or to a range of hospital locations
- ✓ **Schedule content in advance** according to time, day and other variables
- ✓ **Zone content** to show multiple information streams
- ✓ **Broadcast** instant announcements, alerts and updates
- ✓ Use in waiting rooms, public areas, staff rooms, foundation offices, and more
- ✓ **Play popular media files:** .jpg, .png, html, MP4, live streams/webcasting, IPTV and more
- ✓ **Integrate with existing systems** to display dynamic information

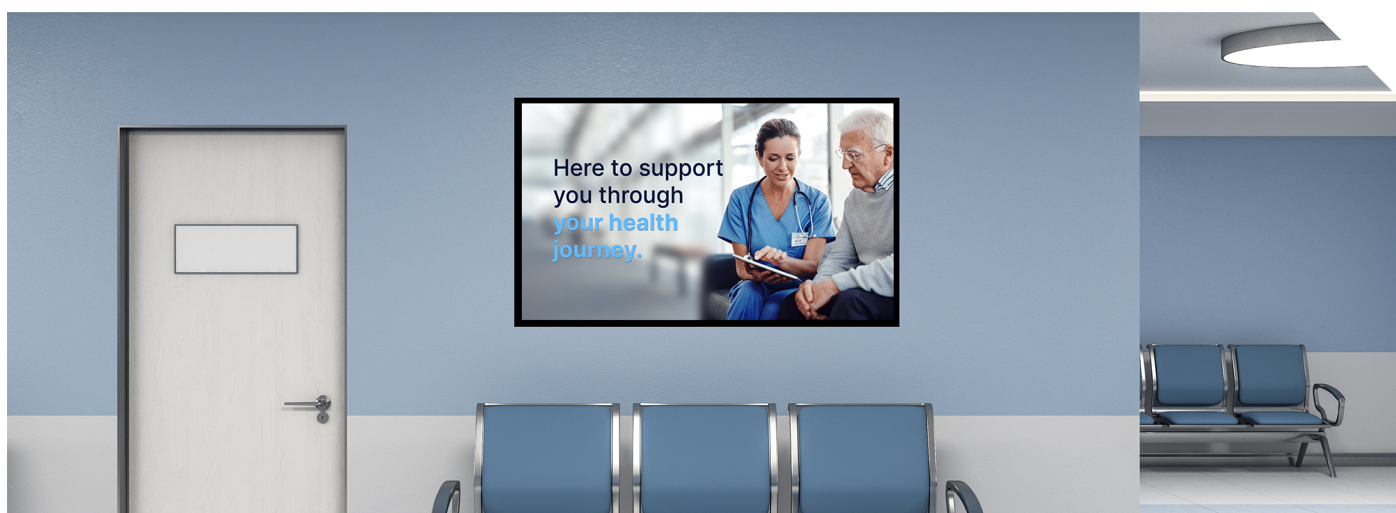

QUEUE CALLING DISPLAYS

- Use digital signage to **overlay calling displays** for queue management
- **Automate workflows** to trigger calling displays when the clinician is ready for the patient
- **Integrate with the Five Faces Queue Management** solution for added functionality such as allowing patients to wait in their location of choice

Digital Signage

PATIENT ENGAGEMENT

5

DIGITAL DIRECTORIES

- **Make updates** to digital directories in real-time
- **Help navigate** visitors quickly
- **Enhance** with wayfinding or zoned information

CHECK IN KIOSKS

- Provide **self-service check-in** to reduce wait times
- Enable group check-ins, screening questionnaires, multi-lingual options – via **easy configuration**
- Provide a **mobile-first option** for patients preferring to check in on their own device

DIGITAL WAYFINDING

- Enhance digital signage with wayfinding
- From **simple maps to interactive wayfinding**

SOFTWARE, HARDWARE, SUPPORT AND MORE

- Our **cloud-based software** lets you upload and **manage content remotely** across your entire network of screens
- **Full choice in hardware** – we are agnostic and can procure and/or advise if existing hardware is suitable
- Services include project management, integration if required, support and design services
