

Manage risks with confidence.

Leave spreadsheets, manual processes, and unintuitive software behind.

“

Hyperproof is a powerful platform that helps us manage all our risks in one place. We save hundreds of hours of time.”

Lawrence R. // Controls Manager, OVO Energy

It's hard to keep track of risks in spreadsheets alone. That's why Hyperproof has flexible risk registers so you can easily manage and centralize your risks.

Your risks: consolidated

Centralize risks

eliminating the need for multiple spreadsheets and disparate systems.

Leverage multiple risk registers

so you're covered across business units, products, and service lines.

Monitor and address vendor risk

to review vendor contracts and manage security questionnaires.

Communicate risk to leadership

Understand your company's risk posture

with real-time dashboards and reporting that provide the answers you need.

Identify which critical risks need attention

so you can prioritize what needs to be done.

Send reports to stakeholders

in your preferred formats with the click of a button.

Evaluate risks based on your company landscape

Use standard fields

for evaluating risks like tolerance, actual risk, inherent risk, likelihood, and impact.

Add custom fields

to act as filters on dashboards and reports to better track risks.

Map risks to controls to eliminate silos

Easily map controls to risks

so you can avoid duplicative work and departmental silos.

Optimize your workflows

with integrations to the tools your teams use every day.
