Who we are

Just Software is a Danish startup who core values are collaboration, honesty and technical excellence.

We always prefer collaboration our clients to provide the best experience for everyone, and we always are willing to go one step further to achieve satisfaction.

We are a company of enthusiastic developers who have huge experience in development for Azure Cloud and DevOps, setting up monitoring and providing highly professional consultancy on the infrastructure and software development.

We care about our clients and value your feedback. This is one of our drivers for high quality products. We provide transparent prices and easy-to-use products.
