

ADOPT A CLOUD!

Specialist in #cloudTransition Services

Cost Management Services simplifies the economic management of the Cloud Platforms. Additionally, this service makes easier the administrative tasks and allows continuous optimization of the consumption and costs forecast.

- Saves costs by the automation of the billing processes, budget and costs management and control.
- Accurate cost allocation by costs centre
- Control of expenses by using entities, automatic alerting and forecast of the costs based on trends.
- Empower the users by providing a tool for the monitoring of the costs and resources deployed on their environments.

This service is based on the use and personalization of our platform “MultiCloud Cost Management” and our Team of Cloud Specialists.

Cost control

Consumption Management

- Full and detailed view for Cloud costs by Cloud, project, Order...
- Translation of the costs on accounting language (Entity, Environment, Project, Type)
