Cloud Readiness and Roadmap

Planning Your Migration Journey

What we are hearing from the market:

Organizations are moving to be „cloud first" or „cloud only", but struggling with concerns like:

- Service downtimes and disruptions during migration

- Lack of inhouse expertise and skills for cloud

- Limited resources for maintaining operational excellence

- Concerns about availability, resilience and security

- Financial uncertainties and unexpected cost overruns

- Unplanned delays and risks during the transition

- Ensuring data integrity and regulatory compliance

Gartner indicates that organizations overspend on cloud services by 30% due to overprovisioning and poor governance.

Follow Cloud Adoption Methodology

How can Centric help to address those challenges?

Our experienced consultants will:

- Develop customized migration plans to address specific business needs.

- Offer end-to-end support before, during, and after migration.

- Conduct thorough cost-benefit analysis and monitor costs.

- Develop continuity plans to prevent downtime and disruptions.

- Ensure data integrity and security with rigorous protocols.

- Conduct comprehensive readiness assessments using CAF and WAF.

- Provide detailed Cloud Readiness Assessment and TCO estimate.

- Deliver a Cloud Transition roadmap within 3-4 weeks post-workshops.

- Ensure active participation from the client's SME team.

- Recommend necessary competencies for the technical team

Key benefits

Viable Migration Planning
Receive comprehensive, specific migration plans that minimize disruptions and align with your specific business requirements.

Financial Risks Mitigation
Gain clear insights into expenses and potential savings through thorough cost-benefit analysis, along with strategies to control and monitor costs, including addressing hidden costs.

Minimizing risk of downtime
Ensure uninterrupted service with robust continuity planning, avoiding downtime and disruptions during the future migration.

Maintain Data Integrity and Security
Stay compliant and protected against breaches with rigorous security protocols throughout the migration process.
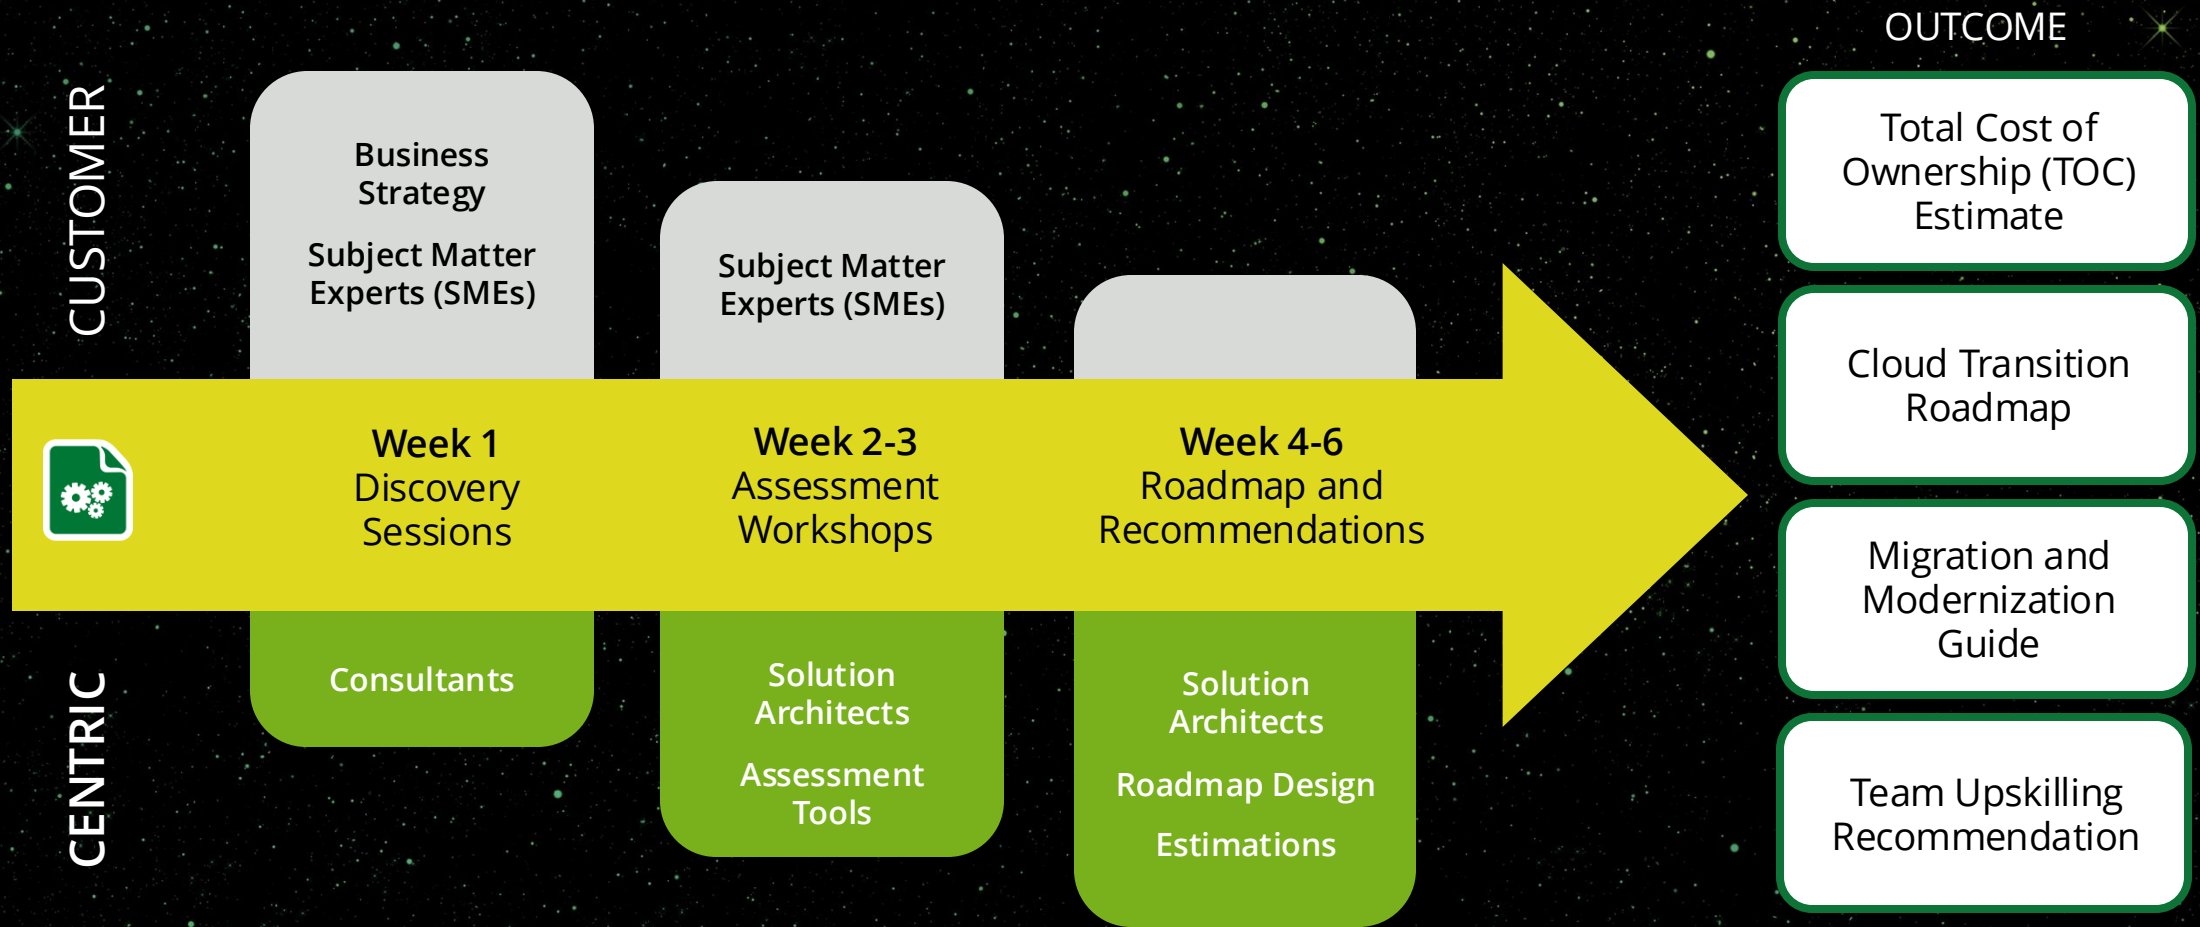

A Knowledgeable Team
We empower your team with the necessary skills and training recommendations to support ongoing cloud adoption and ensure a successful transition. Benefit from experienced consultants who know the complexities of cloud migration projects

You are in control
Our transparent process ensures that clients can maintain control and make informed decisions independently throughout their cloud journey.

CENTRIC

OUTCOME

- Total Cost of Ownership (TOC) Estimate
- Cloud Transition Roadmap
- Migration and Modernization Guide
- Team Upskilling Recommendation

Why Centric?

With extensive experience in managing cross-border transitions, we know how to handle the complexities of diverse regulatory environments, security requirements, and cultural differences.

By staying one step ahead, we anticipate potential issues before they arise, ensuring a smooth and secure cloud migration process - we always have a Plan B.

Our cloud migration approach leverages techniques such as Continuous Integration and Delivery (CI/CD), Containerization and Kubernetes, Infrastructure as Code (IaC) and other DevOps practices, adapted to the culture and the people within your company.

Our unique advantage lies in our blend of traditional IT hosting expertise and modern cloud technology skills - delivered by exceptional talents from the Baltics and across Europe.
