Modernizing Document Management

We help companies across word, regardless of size or industry, to reach their **maximum potential** through centralized and efficient document management.

- Eliminate manual, repetitive, and slow processes.
- Mitigate delays in your approvals.
- Prevent information leaks.
- Ensure regulatory compliance.

Technical Advantages

Save time and money, without lengthy implementation processes

No IT infrastructure deployment

No need for servers or databases; everything is hosted in the Microsoft cloud.

Data Control

All your files and documents are stored in your own Microsoft 365 space.

Secure and Reliable

Install it in your tenant directly from the Microsoft Store. Based on ISO 9001 and 27001.

Multi-Instance

Deploy the product separately by business unit, department, or organizational area, each with its own processes.

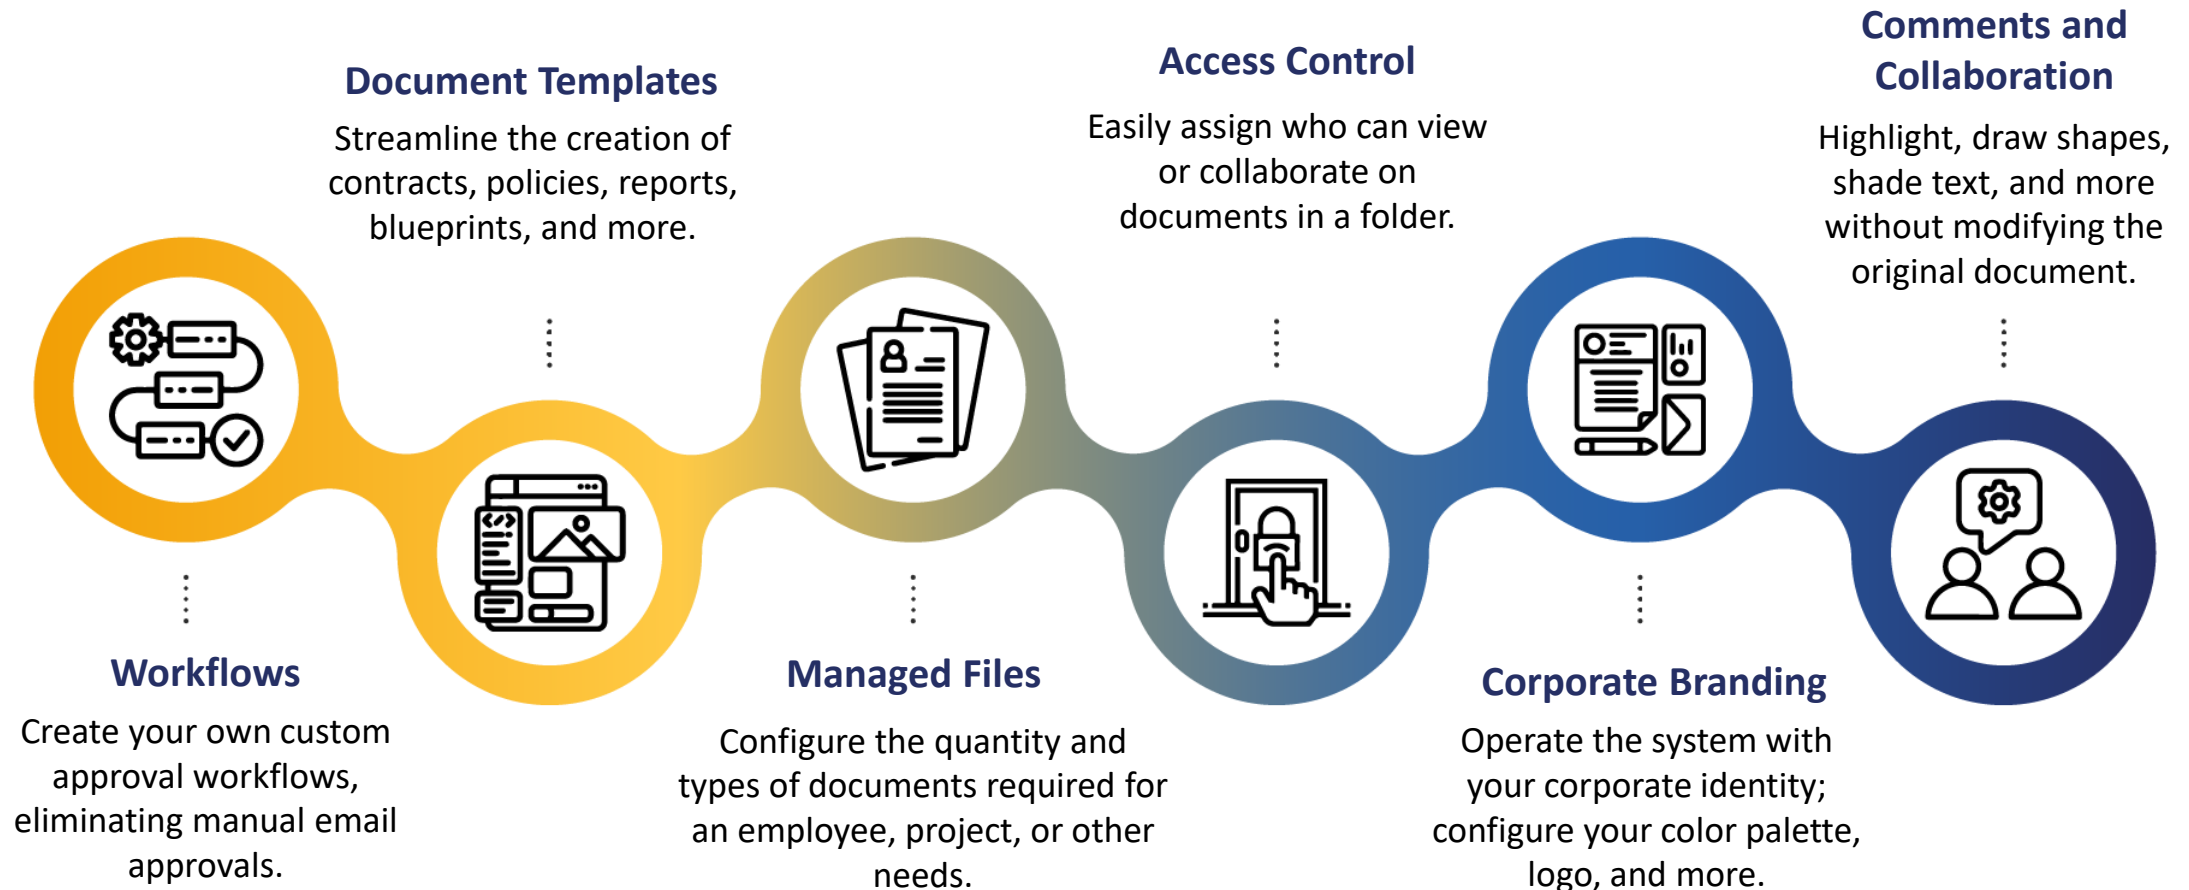

New Updates and Features

We regularly implement features that enhance our clients' productivity.

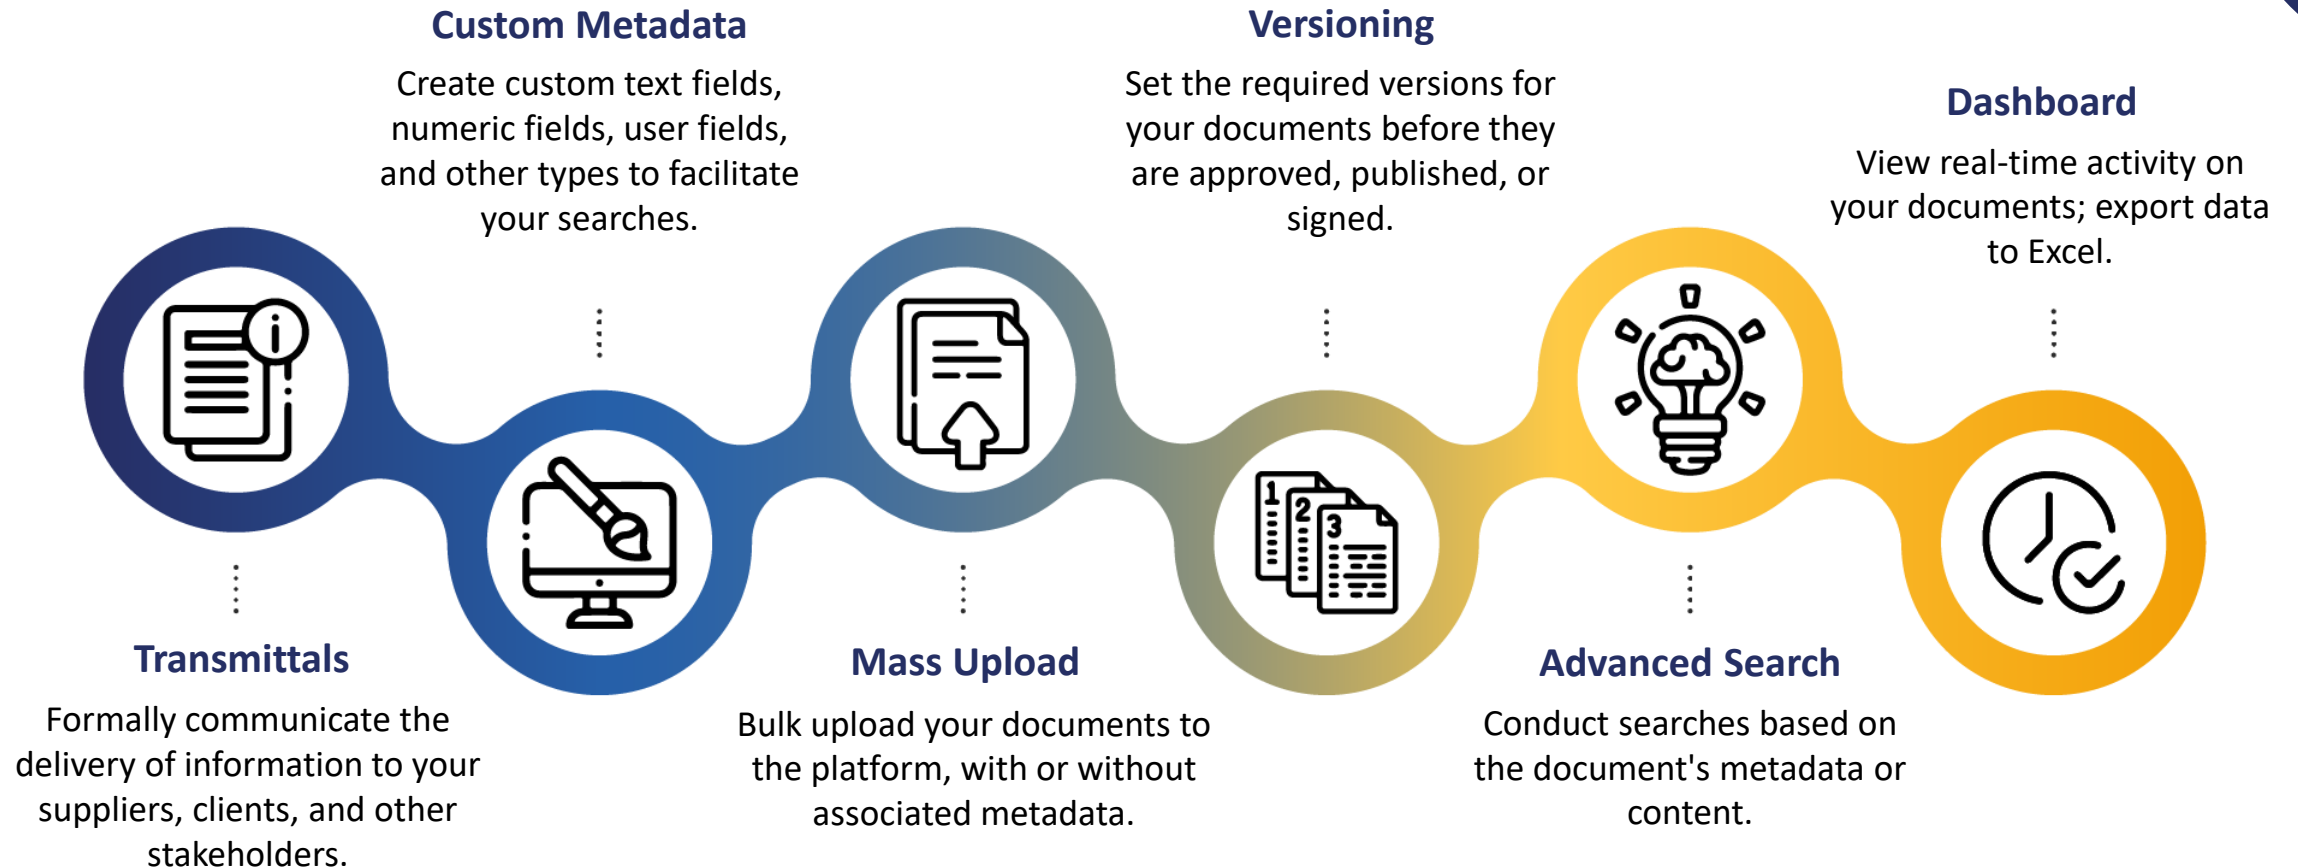

Features and Capabilities

Document Management for Businesses

Features and Capabilities

Document Management for Businesses

Document Management for Businesses

Advanced Features (Add-Ons)

Electronic Signature

Digitally sign your documents using facial recognition for enhanced security.

Permission Report

Know the permissions of a user or group of collaborators across all your documents and folders.

AI Prompt

Quickly and easily obtain relevant information or summaries from a document.

Optical Character Recognition

Convert scanned documents into readable digital text, quickly and easily (OCR).
