![CitusTech logo]

CitusTech's 'Price Transparency for Provider Systems' is an analytical solution that can enable higher rate negotiations, identify pricing irregularities, and establish peer pricing benchmarks. The solution leverages publicly available Payer Machine Readable Files (MRF), enriched with provider demographics and utilization information.

Solution components:

- **Enriched Data as a Service:** Scalable data platform to ingest and store publicly available MRFs & prepare for analytics
- **Bring Your Own Data:** Isolated cloud platform combining MRF data with enterprise datasets, Operational analytics
- **Benchmark Reports:**
  - Show comparison of rates between Provider and its competition in same market
  - Show negotiated rates by Utilization of procedures
  - Show negotiated rates by MIPS score

Solutions Schematic

Download MRF Files from Payer Websites → **Ingest the Payers MRF Files in RealSight (Database)** → **Data Quality Check & Cleanup** →
