

A Provisioning Solution for SharePoint Sites, Groups & Teams

FEATURES

TEMPLATE ENGINE

Create custom templates for SharePoint teamsites, groups and Microsoft teams with just a click. Customize your template with standard functionality and save the complete template as a file in a document library.

TEAMSITE REQUEST

Request sites, groups and teams in a standard SharePoint list and add an approval workflow. Get your fully functional teamsite, group or team without any manual configuration in a few minutes and start working on your project.

GOVERNANCE

Get control of your SharePoint Online environment with a custom teamsite request process, group and user management and apply governance rules through all your SharePoint sites, groups and teams.

Collaboration Manager 365

 SharePoint
2013 SharePoint
2016 SharePoint
2019 SharePoint
Online

The Collaboration Manager 365 is a comprehensive solution for creating, deploying, managing, and synchronizing sites, groups and teams in Office 365. The main functionality consists of the provisioning of teamsites, groups and teams as well as site lifecycle management, template generation and enhancements of SharePoint site and permissions structure.

TOP SPEED

Start your collaboration portal within minutes. Just install the app from our website and start requesting sites, groups and teams with a mouse click!

SELF SERVICE PORTAL

Enable your users to create new sites, groups and teams (site collection based) without the need of administrator permissions. Give them the opportunity to design their own teamsite templates and to add changes to existing sites.

SAVE MONEY

Reduce your administrative effort by using the Collaboration Manager. Don't waste your time by creating sites, groups and teams manually or setting user permissions by yourself.

FEATURES

- Provisioning: Sharepoint Sites, Groups, Teams
- Template Engine
- Sync Across Existing Sites
- Group and User Management
- Self Service
- Flexible Contribution
- Online Management Console
- Approval Workflow
