

Azure Arc Design

CloudTrack – Cloud Management

Atea Finland

ATEA

Azure Arc

The benefits of the cloud in the hybrid environment

Powerful security across the entire IT environment

Defender for Servers on-premise integration

Simplified patching and overall status overview

Manage on-premise and cloud updates in the same platform

Extend the life of servers and Windows versions

Azure Arc offers an alternative solution for Continuing Security Updates (ESU)

Cost optimization

Replace traditional licenses for patching (SCCM), Extended Security Update (ESU), and monitoring (SCOM) with Azure Arc ("Pay as you Go")

Training

Azure Arc Fundamentals

Deployment

Azure Arc Enabled Servers
10-20 servers

Implement services and training

- Azure Update Manager
- Defender for Server
- Extended Security Update End-of-Life servers

Operations

A wooden canoe is docked on a wooden pier in a calm lake. The water is dark blue and reflects the surrounding snow-capped mountains and dense forest. The scene is serene and majestic.

We build the future with IT
