# Zensar's Azure Stack HCI for Hybrid Cloud

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

See what customers are saying:

"We are delighted to have Zensar as a trusted Cloud partner and advisor. Our legacy IT infrastructure was slow, difficult to manage, and expensive to procure and maintain. We leaned on Zensar to build a more cost-effective IT solution that would provide better performance, enable rapid scalability, and simplify delivery of all enterprise workloads. They exceeded our expectations by leaps and bounds. Our new unified operations group can now optimize and manage the entire infrastructure stack from a single console, driving IT innovation across the company."

– CIO, Retail Firm

WHAT WE OFFER

Zensar's Microsoft Azure Stack HCI is the fastest and easiest way to extend your data center to the cloud leveraging Azure Stack HCI, a purpose-built, hyper-converged infrastructure (HCI) operating system from Microsoft for modernizing on-premises operations with cloud-native capabilities and management. The solution leverages the following Azure services to provide a strategic hyperconverged infrastructure foundation -

1. **Azure Stack HCI:** Azure Stack HCI is a hyperconverged clustering solution that uses validated hardware to run virtualized workloads on-premises, making it easy for customers to consolidate aging infrastructure and connect to Azure for cloud services. It provides the latest security, performance and hybrid capabilities for the hyperconverged infrastructure.

2. **Windows admin center UI:** Windows Admin Center is a locally deployed, browser-based app for managing Windows servers, clusters and hyper-converged infrastructure. This provides a single pane of glass for centralized management of the Infrastructure. Best for consolidating data of ROBO location.

Zensar's Azure Stack HCI solution is differentiated by its agility and the flexibility to work with any infrastructure posture as per client needs.

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
