

Come together when you're apart

Discover more robust collaboration, shorter review cycles, and greater productivity during remote meetings with JoinXR by Fracture Reality and Microsoft HoloLens 2.

Fracture Reality is a Gold Microsoft Mixed Reality Partner specializing in building HoloLens 2 enterprise collaboration tools. To help organisations better optimize virtual meetings we have created JoinXR, an affordable enterprise-extended reality (XR) remote meeting platform that integrates with Azure Remote Rendering.

JoinXR generates interactive 3D presentations in minutes so teams can bypass the limitations of 2D without spending valuable time and resources on renders and prototypes.

Bridge the distance with HoloLens 2

Strengthen collaboration

Instantly meet colleagues and clients from around the world in real-time holographic meetings.

Accelerate project timelines

Learn how to speed up project delivery and reduce errors caused by poor decision making.

Optimize costs

Keep travel costs down and save time when working on projects with your teams.

“ Fracture Reality have been exemplary technology partners...
... This tool will change the way we approach working discussions and design presentations, towards **more collaboration and improved productivity**.

– Govt Client SE Asia

JoinXR is multiplatform

and supports: HoloLens 2
Windows 10
Oculus Quest 2
HTC Vive Focus 3

Rapid Workflows

Convert CAD in minutes into detailed 3D renders for direct manipulation & visualization using Azure Remote Rendering.

Low friction

Join teams and customers around the world using HoloLens 2 to simulate in-person meetings using instantly created photoreal avatars.

Impeccable UX

Integrate key documents and information then sketch and annotate models so reviewers can make quick, intelligent decisions.
