

# Easy security management for Office 365

# Stay safe in the cloud

Office Protect is an Office 365 add-on designed to increase your clients' cyber safety. It allows you to easily implement recommended security settings, threat prevention, monitoring and reporting, and provides an extra layer of defense against malicious attacks and unintentional breaches.

## Be cyber smart with extra protection for Office 365

45%

of malware is delivered via Office attachments e.g. .doc, .xls, .ppt, etc. (Verizon, 2019)

70%

of cyber attacks Q4 2018 targeted Microsoft Office products (Kaspersky Labs, 2019)

250%

increase in inbound emails that were phishing attempts 2018-2019 (Microsoft, 2019)

## How Office Protect keeps your clients safe

Office Protect can immediately inform you if:

- Attackers delete user accounts
- Admins abuse privileges
- Email data is extracted to external sources
- Users share company data publicly
- CEO or management identity fraud is detected
- New user accounts are created without authorization
- Unexpected changes are made to security settings
- CEO or management identity fraud is detected
- Office 365 account credentials have been made public
- Unknown actors access accounts

# Comprehensive security features
