Created in collaboration with EcoEd

92% of consumers say they're more likely to trust brands that are environmentally or socially conscious.

Implementing sustainable practices is integral to the success of a 21st century company.

EDUardo's Eco module trains companies of the future in minimizing environmental impact while keeping the company profitable over time. Take control of a manufacturing company as you navigate through the challenges of going green in real-time.

Make sales decisions while taking into account environmental impact and the life cycle of your product.

Achieve operational efficiency by managing staff, warehouse capacity, and finances.

Maximize your company's potential by finding the right balance between using conventional and eco-friendly raw materials.

Develop new eco-projects to optimize production, reduce environmental impact, and increase your eco-score.

Determine your marketing strategy while taking into account your company's current sustainability levels and the risks of greenwashing.
