

ECLIPSE

Children's Social Care

ECLIPSE

Your No.1 efficiency tool

Why should you record what the system should be able to work out for itself? Traditional case management systems lacked intelligence, which meant everything needed to be manually added to the system. But the next generation is here:

With **ECLIPSE**, data not only flows through the system, it pre-populates if the relevant family information is in the system. This automation can reduce administration by up to 80%.

Group recording is central to **ECLIPSE**. The group recording functionality within **ECLIPSE** reduces administration further and enables the user to record across a family group, easily reducing the recording requirement and freeing up time to spend with the most vulnerable.

“As easy to use as Facebook”

Like the best Cloud Native applications found today, such as Amazon and Facebook, **ECLIPSE** has been designed with the end user in mind. Users simply log on to a personalised view of the system and are guided through to the next steps. They can be using **ECLIPSE** within minutes.

Easily configurable forms and workflows

Intelligent automation

Easy to use

Multi-device

ECLIPSE supports:

- Multi-Agency Safeguarding Hubs
- Early Help
- Troubled Families
- Child Protection
- Child Looked After
- Child Sexual Exploitation
- Missing Children
- Fostering and Adoption
- Strength-based Assessment
- Family-based Approach
- CP-IS
- Transition

Embedded professional guidance

Complete data security

Save time

Fully hosted and supported

Management overview

ECLIPSE

Great things happen when you work together

With the increased focus on multi-agency, we have developed **ECLIPSE** to create collaborative environments that ensure effective support for families.

ECLIPSE's sophisticated security model enables professionals to easily work together around a family, offering them the support they need to empower themselves.

Personalised joined up view

Each user has their own personalised view of the case based on their privileges. Each worker is alerted when they need to feed further information into a case through a text or email (based on their own preferences.)

Reduced complexity

ECLIPSE is a single database solution from a single supplier. It provides the ability for one database to be used across Education, Early Help, Troubled Families, Children's Social Care and Adult Services, reducing complexity and removing the risk of children falling through the gaps.

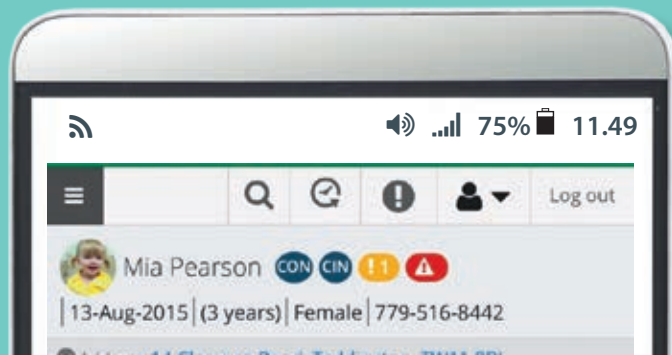

A photograph of a family of four sitting on a sofa. A young child is in the center, holding a white bowl and eating. A woman is on the left, smiling at the child. A man is on the right, smiling and looking at the child. The scene is warmly lit, suggesting a happy, domestic setting.

"ECLIPSE has helped facilitate the gathering of information from external agencies in an efficient and timely manner"

Plain and simple multi-agency working

ECLIPSE brings the right professionals
together at the right time, to enable co-ordinated
assessment and support

ECLIPSE

Spend more time with your clients

Local authorities need a social care information system that supports professionals in their role – not one that controls them. **ECLIPSE** is delivered with our best practice Children's Services configuration. This can be deployed quickly and is easily amended.

Transforming the way you work

Smart automation simplifies and streamlines

ECLIPSE has inbuilt intelligence to help you simplify and automate your operations to reduce costs and improve the service you provide.

Our technology ensures you are able to reduce your workloads and provide more time for workers that can be spent with families. Features such as auto-save, spell check, inbuilt links to local and national guidance and pre-population of data improves overall data quality.

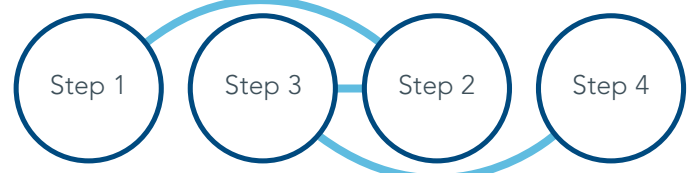

Real world workflow

Configurable workflow to support, but not drive processes. With traditional workflow, you need to follow a defined process rigidly and this can get in the way of effective recording when the real world fails to follow the ideal state. **ECLIPSE** has been designed to enable flexibility in recording.

Ideal scenario

Real world scenario

Record in new ways with ECLIPSE

On the go

ECLIPSE is available anywhere, anytime and on any device

Using your voice

Using devices such as tablets you can dictate straight into the system without typing

Adding a picture or video

A picture is worth 1000 words.
Multimedia can be added to the record to provide further detail on the case

Automated

ECLIPSE is intelligent.
It automates known tasks based on the information already recorded

Self-assessment

Children or their carers can record their own information

ECLIPSE

The complete platform

ECLIPSE brings together all the information you need to deliver on your vision for Children's Services.

Integration

OLM's 'Open Systems' ethos means that we can integrate **ECLIPSE** with a huge range of complementary third-party applications.

Finance

Finance management is becoming increasingly important within children's social care. With more than 27 years of expertise behind us, we have the knowledge and experience, supporting more than £2bn per annum. We can help you to support Foster Carer payments, residential care and section 17 payments, alongside much more.

Reporting and analytics

ECLIPSE's powerful dashboard functionality saves you time by reducing the need for ad-hoc reporting

ECLIPSE includes the entire set of children's statutory returns out of the box

ECLIPSE has been built to integrate seamlessly with any chosen data visualisation tool, for example Business Objects or Tableau

ECLIPSE's powerful dashboards bring information to life

About OLM

OLM's mission is to apply our technology and services to take complexity out of people's lives, whether they consume, deliver or enable care services. We do this through investment, passion and innovation in software and services.

We work collaboratively to make a positive difference to the lives of the most vulnerable adults and children across our communities.

250+ specialist UK staff

OLM's 250+ specialist UK based staff support our growing customers base across Health, Local Authorities, Care Providers and Charities. Many of our staff come from a social care background, with specialist understanding of the UK care sector.

The ECLIPSE platform covers:

Case Management	Multi-Agency Safeguarding	Financial Management
Commissioning Management	Bed Management	Citizen Engagement
Transformation and Change Management	Security and Governance	Data Services
