

# Security Guardian for Microsoft 365

## Sentinel Technologies offers Security Guardian for Microsoft 365

Your single solution for expert guidance and security monitoring of your Microsoft 365 tenant. Ideal for businesses seeking to enhance their security posture without complex operational overhead.

### The service provides:

- Monthly reports of security posture
- Insightful analysis from experts
- Optional remediation support

Address security misconfigurations and risk effectively. It is the perfect solution for customers who want to stay ahead of security threats and ensure their team is equipped to resolve issues swiftly.

Sentinel Technologies engineers support your organization during monthly calls to review prioritization of findings, review finding details, and how to remediate findings that will improve security posture.

### Additional Details

- Over 150 security configuration tests
- Recommendations for any Microsoft 365 license combination
- Supporting Cybersecurity & Infrastructure Security Agency (CISA) Secure Cloud Business Applications (SCuBA) configuration guidance
- Supporting Center for Internet Security (CIS) Microsoft 365 Foundations Benchmark
- Supporting Microsoft security configuration guidance

\*Remediation of report findings by Sentinel Technologies quoted separately.

**Gartner predicts that through 2025, more than 99% of cloud breaches will be traced back to preventable misconfigurations or mistakes by end users.**
