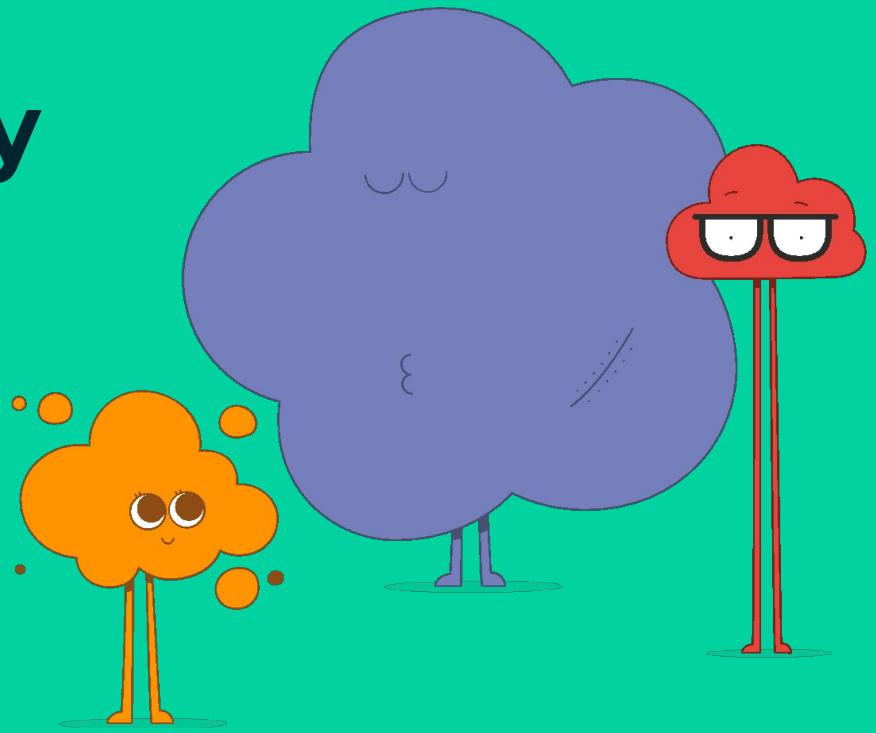
CLOUD GATEWAY

# An Introduction to Cloud Gateway

Securely connecting anything to everything

Azure Marketplace



# About us

The UK's first SASE platform, offering network and security solutions for the public and private sectors

## Our mission

To provide easy access to the technologies that drive innovation, progress and collaboration for the benefit of everyone.

## Our promise

To place customers at the centre of our services, from design and development through to service delivery and support.

## Our ethos

To be truly agnostic in delivering a Digital Foundation that underpins meaningful and lasting change.

CLOUD GATEWAY

# Let’s talk SASE

## Connecting people, places, devices and data

SASE stands for 'Secure Access Service Edge'.

It is a term coined by Gartner to describe a cloud-based, unified approach to networking and cyber security. It's a relatively new term, so expect to see different interpretations of it in the marketplace.

Our SASE platform consolidates a range of network and security capabilities into a single managed solution. You choose the tools you need to improve network performance, reduce cost and complexity, and strengthen security.

CLOUD GATEWAY

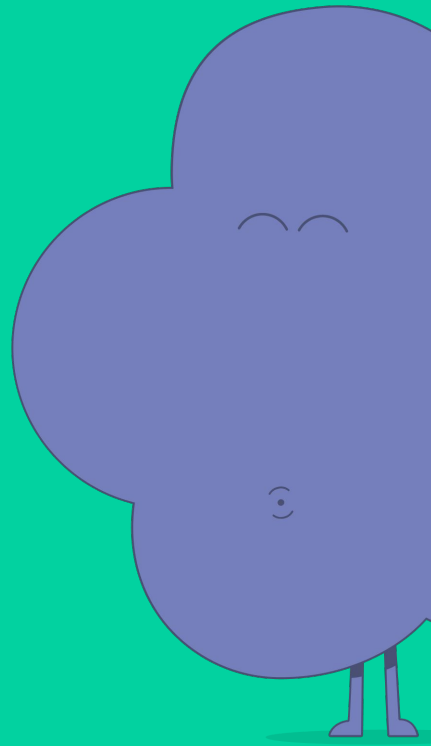
# A simple route to cloud

## Secure, fast and simple cloud connectivity with SASE

Our SASE platform provides on-demand, scalable connectivity to one or more cloud service providers.

Seamlessly connect your users, sites, data and cloud environments in a matter of minutes.



CLOUD GATEWAY

# Transform your network with SASE

## Learn how we're different to the rest

Our cloud native SASE platform unifies industry leading network and security technologies and software into a single managed service. We work alongside you to design, build and deploy a bespoke solution that meets current and future requirements.

We arm you with the capabilities and tools needed to exploit cloud, hybrid and multicloud strategies, giving you a level of agility and responsiveness that traditional providers have been unable to deliver.

CLOUD GATEWAY

# Our 3 pillars of SASE

Providing the tools and support to future proof the performance, reliability and security of your network

## Connect

Our Connect pillar provides your organisation with a full suite of network connectivity capabilities to bring your entire ecosystem together, saving you time, budget and resource.

## Protect

Our Protect pillar provides you with a comprehensive set of security tools. Choose how you want to protect your network with granular control over policies and governance.

## Inspect

The Inspect pillar gives you full visibility of your network performance, utilisation and traffic flow in real time. It also allows you to track and amend security configurations with ease.

# Pillar 1: Connect

Choose the network capabilities you need to seamlessly bring your entire ecosystem together

Securely connect anything to everything without delay or disruption

1. On demand private connectivity to cloud
2. Secure remote access
3. Connectivity to the PSN and HSCN
4. Fully managed WAN solutions
5. Connect your data centre, office and branch sites in minutes
6. Flexible bandwidth options
7. Track performance and utilisation using My Cloud Gateway

# Pillar 2: Protect

## Let's talk security

Select from a toolkit of security services to create the perfect solution for your requirements

1. Layer 3 and 4 firewall capabilities
2. Zero Trust security model and approach
3. Secure Web Gateway module
4. Enhanced Web Application Firewall (WAF) solution
5. Full FWaaS suite of cloud native security protections, including:
   - Antivirus and malware
   - IPS/IDS
   - Deep packet inspection
   - Geo IP blocking

# Pillar 3: Inspect

## Full visibility of your network traffic and security configurations

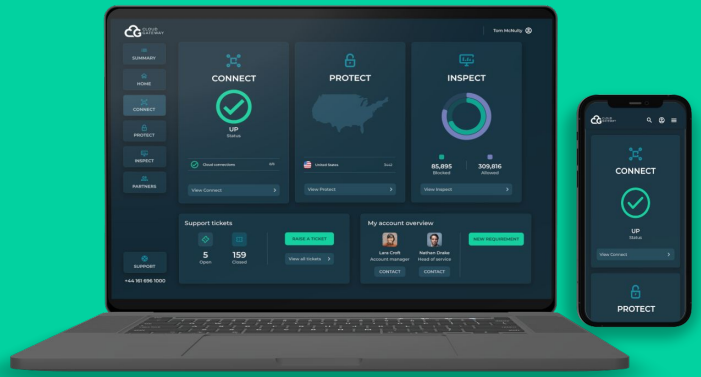
Everything you need to know about your network, users and data at your fingertips

1. Full access to My Cloud Gateway
2. Track your network performance, utilisation and traffic flows in real time
3. Monitor and react to bandwidth usage and trends
4. SIEM/SOC integration available

# My Cloud Gateway

Keep track of your network performance, utilisation and traffic flows in real time

1. Simple, intuitive and configurable dashboard
2. Access to advanced monitoring and analytics tools
3. Raise and track support tickets
4. Gain full visibility of network, users and data
5. Download and schedule detailed reports
6. Track cyber threats using interactive security maps



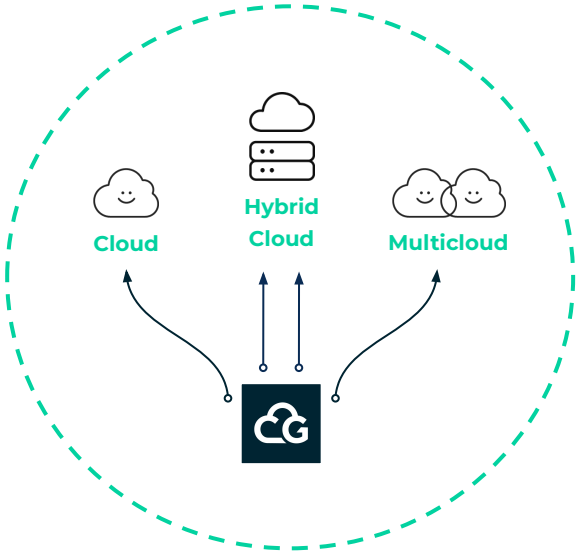
CLOUD GATEWAY

# Building a strong Digital Foundation with SASE

## Easy access to the benefits of hybrid, inter and multicloud strategies

A strong Digital Foundation delivers increased control over the technologies and vendors being utilised to power the digitalisation of your business.

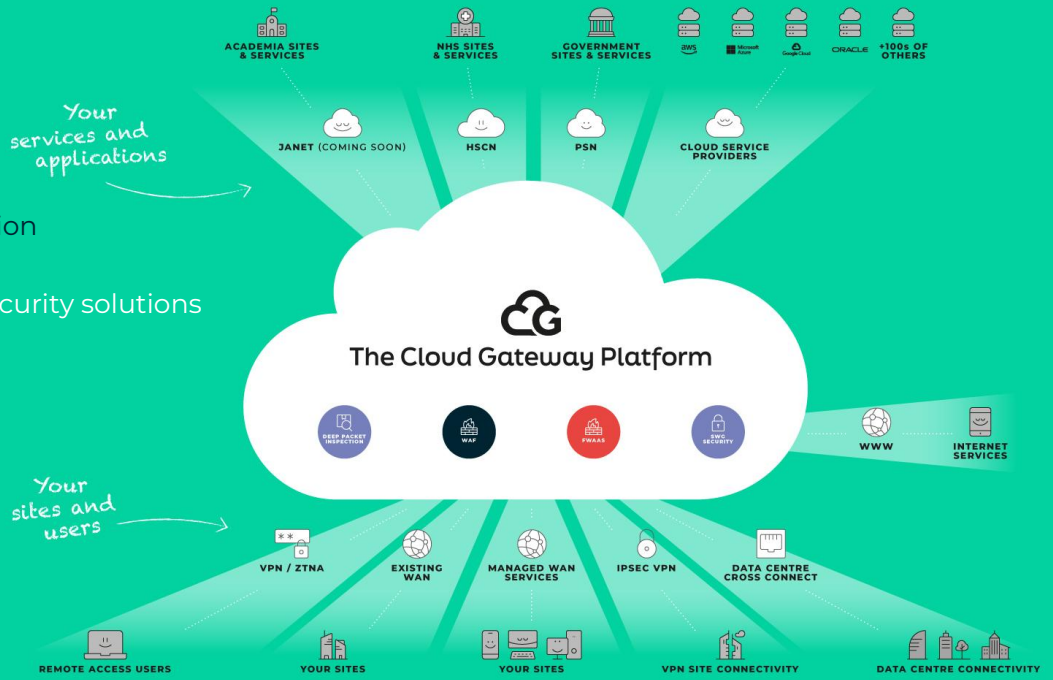
Our team of network and security specialists ensure your organisation is future-proofed against the evolving digital and security landscape.



# Join our ecosystem

## Here's why

1. Optimise network performance
2. Spend less time and money on IT administration
3. Industry leading, cloud native network and security solutions
4. Protect users, data and systems
5. Address cloud and network skills shortage
6. Transition away from legacy technologies
7. Create a foundation for transformation



HM Courts & Tribunals Service

# Customer story

Learn how our SASE solution continues to support HMCTS in their reform of the justice system

## How we helped: Ministry of Justice

A crucial aspect of these reforms was to design and build common capabilities that could be utilised by the whole Ministry. From a security and networking perspective, this meant laying the foundational building blocks that would allow new services to be deployed rapidly without unnecessary cost or disruption.

1. Cost savings realised
2. Strengthen security posture
3. Greater operational agility
4. Cloud First compliant
5. Bridge networking and security skills gap
