

Fabric Real Time Intelligence: One-Day Workshop

This workshop enables your organization to create customized real-time analytics solutions tailored to your organization's needs.

Unlock the full potential of your data with iLink's Real-Time Analytics Enablement service. Our comprehensive solution leverages the power of Microsoft Fabric's Real Time Intelligence to deliver a robust, scalable, and secure real-time analytics platform tailored to your organization's unique needs.

Our approach to leveraging Microsoft Fabric's Real Time Intelligence (RTI) is based on:

iLink is on the key partners list for gathering feedback on new and upcoming features in Fabric RTI with the Microsoft Fabric RTI Product Group. Deeply connected with the product group sharing feedback on key features and helping customers accelerate their journey with RTI.

One-Day Workshop:

This one-day workshop is designed to leverage Azure's powerful analytics tools to create customized real-time analytics solutions tailored to your organization's needs. From initial consultation to full implementation and ongoing support, we ensure a seamless transition to a data-driven culture.

Agenda:

Introductions:

- ✓ Discuss Objectives and expected outcomes
- ✓ Agenda Overview

Overview of Fabric's Real-Time Intelligence:

- ✓ Ingestion & Processing using Eventstreams
- ✓ Medallion Architecture & Hot/Cold Storage
- ✓ Transformations & Storage – Eventhouse
- ✓ Real Time Dashboards

Success Stories and Live Demo:

- ✓ Discuss Retail Real-Time implementation
- ✓ Live demo of a couple of real-time solutions with Microsoft Fabric

Interactive Discussion:

- ✓ Understanding customer scenario for real-time analytics
- ✓ Brainstorming custom solutions

Next Steps:

- ✓ Map out steps for implementation
- ✓ Identify metrics for success & KPIs

Benefits:

- Gain **actionable insights** as data is generated, enabling **quicker decision-making** and enhanced responsiveness to market changes.
- Optimize operations by identifying and addressing issues in real-time, reducing downtime, and **improving overall efficiency**.
- Deliver **personalized** and timely **experiences** to your **customers** by leveraging real-time data to understand their needs and behaviors.
- Stay **ahead of the competition** by making data-driven decisions faster than ever before.

iLink has delivered multiple RTI workshops and customers have had clarity on embarking on a journey in real time intelligence. Over 50% customers have started with an initial proof of concept with Fabric RTI and are on their way to realizing the potential benefits of the solution.
