Identity Services

eSignatures

Connective eSignatures

Choose the right eSignature for your processes!

QUALIFIED DIGITAL SIGNATURE

This signature warrants authentication, integrity, confidentiality and provides non-repudiation. The court cannot make any decision on the juridical value of this qualified signature: it is fixed by the law and no one can refuse it.

High assurance of eIDAS

ADVANCED ELECTRONIC SIGNATURE or DIGITAL SIGNATURE

Used for identification and to secure a document's content against alterations. The juridical value it has is for the integrity of the document, the signer's identity is subject to a court's ruling.

Substantial assurance of eIDAS

BASIC ELECTRONIC SIGNATURE

Used for identification: it ensures the signature is performed by the key holder. Anyone who holds the key (key holder), can claim the identity of the key owner. A basic electronic signature is admissible as evidence in legal proceedings, but the court must rule its juridical value.

low assurance of eIDAS

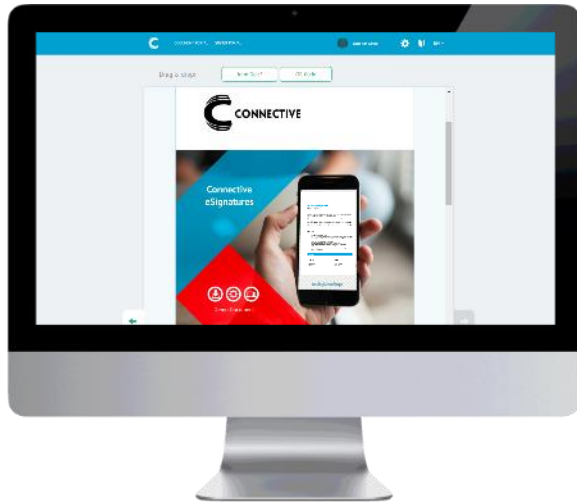

Insufficient guarantees for value transactions!

API or Stand-Alone solution

Connective eSignatures

Our approach

UPLOAD DOCUMENTS

Upload the document or a package of documents you want to have signed including PDF and Word. Through API any given format is supported (even video, XML, ZIP files,...)

STEP 1

STEP 2

Manage signing process

STEP 3
