

Software that Changes the Outcome, with AI Powered Operations

ABOUT OUR WORK

From humanitarian aid to vital manufacturing components, Palantir's software is the backbone of several critical supply chains across the globe. Palantir Foundry our platform for AI powered operations supercharges your existing technology investments to bridge siloed planning and execution processes, optimize inventory management, and help build supply chain resilience for economic and geopolitical uncertainty.

PALANTIR PARTNERS

- Enabled WFP to track and update shipments during COVID 19 in near real time
- Ensured the delivery of 148,000m3 of cargo to 173 countries during the COVID 19 pandemic, creating \$30M in savings

- Accelerated supply chain collaboration as part of Skywise a global airline platform for integrated operations
- Increased production of Airbus 350s by 33%, while identifying an estimated \$1.7B a year in savings

- Integrated sales and operation planning and execution processes for near real time disruption resolution
- Created \$200M in savings over 24 months, including \$40M in logistics optimization in 120 days

- Building a first-of-its-kind digital healthcare ecosystem
- Creating secure cross-entity visibility for healthcare providers, suppliers, and manufacturers

- Optimized workflows by leveraging high scale edge data from telematic systems
- Facilitating the proactive management of supply chain risk to keep pace with changing global markets

- Building a global consortium platform for end to end visibility of carbon emission data
- Enabling partners to track and manage Scope 1, 2, and 3 emissions at scale

REAL-WORLD IMPACT

U.S DEPARTMENT OF HEALTH AND HUMAN SERVICES

COVID 19 RESPONSE

- Integrated and operationalized COVID 19 data streams from every U.S state in a matter of weeks.
- Helped protect the most vulnerable throughout the pandemic with more effective prioritization.

"We went from that simple sheet to a comprehensive analysis with data streams from every state, every hospital, every laboratory within a matter of weeks....That was the data we used...to completely rearrange the health supply chain."

Dr. Deborah Birx
↳ Former White House Coronavirus Response Coordinator, FoundryCon 2023

COVID 19 VACCINE DISTRIBUTION

- Empowered NHS users to perform data driven prioritization for PPE and COVID 19 vaccine distribution
- Enabled 6.9 billion items of PPE to be effectively distributed, alongside a "world beating" vaccine roll out, which saw up to 771,000 vaccinations administered in a single day.

"Foundry has been a key tool in the NHS's biggest ever exercise in operational data integration [...] It provided, in the repeated words of a number of those interviewed, 'a single source of truth' for what was happening within the vaccine roll out."

Nicholas Timmins and Beccy Baird
↳ The King's Fund, 2022

Software that Changes the Outcome, with AI Powered Operations

OUR INDUSTRY IMPACT

→ CPG

Bridge siloed supply and demand data through autonomous planning and execution.

→ RETAIL

Bridge siloed supply and demand data through autonomous planning and execution.

→ CONSTRUCTION

Integrate workforce and resource information in near real time to optimize operations.

→ FOOD & BEVERAGE

Reduce overstock incidents and redistribute stranded inventory with a near real time operating picture.

→ HEALTHCARE

Improve patient outcomes with a common data foundation for drug manufacturing and distribution.

→ MANUFACTURING

Digitize supply chain workflows and product cycles to track and manage intervention effectiveness.

→ HOSPITAL OPERATIONS

Securely manage cross entity visibility into inventory and demand, to enable more proactive decision making.

→ METALS & MINING

Track and manage Scope 2 and 3 supply chain emissions for better visibility, reporting, and mitigation.

ACHIEVE AI DRIVEN DECISION ADVANTAGE

- Sense disruptions in the supply chain
- Conduct root cause analysis
- Simulate the best action, next best action, through unlimited variations
- Model the upstream and downstream impacts
- Orchestrate resolutions across organizational boundaries
- Drive automation over time

“Our value here is that we’ve had about 20 different projects, we’ve created over \$200 million in value savings. That’s a big deal.”

Scott Spradley
↳ Former CTO

MADE POSSIBLE BY THE FOUNDRY ONTOLOGY
