

# ANGELICA\_AI

BRINGING THE POWER OF  
GENERATIVE AI TO YOUR DATA

## OVERVIEW

Angelica AI is an intelligent assistant that transforms how businesses interact with their data. Using an advanced Microsoft Large Language Model (LLM), Angelica can understand and generate language, enabling seamless data analysis, automated customer service responses, and the generation of insightful reports. This innovative technology allows businesses to efficiently sift through vast datasets, reducing time spent on mundane tasks and enhancing overall productivity. Highly customisable, Angelica AI can be tailored to address a wide array of business challenges, ensuring it meets specific needs and requirements.

Angelica is versatile and can serve as both a customer and team-facing avatar or a back-office AI integrated with Robotic Process Automation (RPA). This flexibility allows Angelica to enhance Intelligent Automation, providing comprehensive solutions that streamline workflows and decision-making processes.

25% of employee time is spent  
searching for information. That's  
around 500 hours per year.

- The Economist Intelligence Unit, 2022

## FEATURES & BENEFITS

**INFORMATION RETRIEVAL:** Access information from vast datasets quickly and accurately, significantly reducing the time and effort required for manual searches.

**CUSTOMER SUPPORT:** Provide prompt and accurate responses to customer inquiries, enhancing customer satisfaction and reducing support costs.

**DOCUMENT SUMMARISATION:** Summarise lengthy and complex documents into concise key points.

**EMAIL TRIAGE AND FORWARDING:** Automatically sort and forward emails to the appropriate recipients, enhancing communication efficiency.

**CONTENT CREATION:** Generate compelling content that is tailored to your specific audience, ensuring that the message resonates and engages effectively.

**LANGUAGE TRANSLATION:** Translate between multiple languages with accuracy and ease.

**SEAMLESS INTEGRATION:** Effortlessly incorporate Angelica into your existing systems, maintaining a unified and efficient workflow.
