

esFields

by

esFields provides customers with a simple to use **field data collection solution**.

It can be customized by using one of the 3 modules : **esAgent** (SFA, Route optimization), **esInsights** (Merchandising), **esVisits** (Dispatch, Fleet management, Repair services).

esFields provides real time data from field activities and integrates with ERPs and CRMs while still allowing for an independent management of the system, if required.

esFields is provided as a SaaS solution operating on Microsoft Azure Cloud.
