# Atrius Asset Locator

Asset tracking and management software service

By [Atrius](#)

OVERVIEW

SPECIFICATIONS

Atrius Asset Locator is a cloud-based software service that delivers indoor asset tracking and management by leveraging the Atrius ecosystem of solutions.

**Enhance business performance with Atrius Assets** to provide accurate location, pathing and alert monitoring of items, equipment and personnel, directly from a web browser or via integration with business applications.

**Gain through understanding** of assets' location and movement trends, to optimize workflows, enhance on-demand and dispatch services, redesign space layouts, implement safety or theft prevention initiatives, and improve equipment utilization and maintenance.

**Deepen spatial and behavioral analysis** with the Atrius Assets APIs to visualize and analyze your data.
