

How to:

From status quo to an ESG data platform

An ESG data platform is the central solution to be ideally positioned for ESG reporting and to have all relevant data in one place. However, the path to an ESG data platform is anything but clear.

▶ One-day workshop: All the info on the path to an ESG data platform

▶ ESG DATA EXPLORATION

Step 1 of our workshop deals with the ESG analysis of the data landscape (“ESG Data Landscape Map”). The aim is to assess the completeness and accuracy of the data relevant to the ESG KPIs.

	1	2	3	4	5
Accessibility: <small>How accessible is the data?</small>				■	
Storage: <small>How is the data stored?</small>					■
Integration: <small>How integrated is the data?</small>		■			
Relevance & Sufficiency: <small>How relevant and sufficient is the data?</small>	■				
Quality: <small>How is the data quality?</small>					■
Granularity: <small>What is the level of granularity of the data?</small>			■		
ESG Data Availability: <small>How is the ESG data available?</small>		■			

▶ ESG DATA PLATFORM FUNDAMENTALS

Data platforms always have individual requirements - ESG data platforms are no different. We shed light on these special requirements and show what is important.

▶ ESG DATA PROCESSING

ESG-relevant data is often not available in the required metrics. In step 3 of our workshop, we will show you how processing and conversion can work in practice and what best practices there are for this.

▶ ESG DATA INTEGRATION

The necessary data is usually distributed across the entire data landscape. We explain how this data can be merged seamlessly and automatically and what special ESG characteristics there are.

▶ ESG DATA PLATFORM – BEST PRACTICES

At the end of our workshop, we will present what the next generation of ESG data platforms will look like and what best practices can already be found today.

Your Outcome

After your one-day workshop, you will have a complete blueprint for your path to an ESG data platform, including templates and best practices. All workshop content and results are documented and made available.

7.500€ (up to max. 5 participants)
12.500€ (up to max. 10 participants)
