

Intelligent Document Automation with DocAI

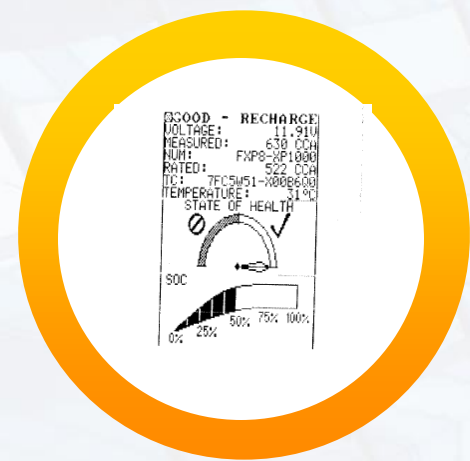

Extract information from documents efficiently and track health of processes

- Paper-based or manual document processing can be time-consuming and prone to errors. AI-enabled Vision technology allows document extraction 40X faster than manual retyping.
- DocAI, our automated AI solution, extracts information from documents/images efficiently and provides performance reports of processes to boost business growth.

How Does DocAI work?

Securely and quickly transform data from documents to a competitive advantage.

Multiple Data Sources

Wide file support from pdf to images - pdf, doc, jpeg, png etc.
API integration with enterprise applications.

Streamline Data Extraction

Extract the relevant fields and values from the documents efficiently with OCR integration.

Data Validation

Data cleaning and validation of dimensions and corresponding values with accuracy and precision through custom algorithms.

Data Storage

Store extracted data in queryable database. (Issues / error with data is sent back to source application)

Insights and Reports

AI-driven performance insights and reports on documents, extracted data and health of process (including audit)

Effortless AI integration with existing enterprise applications with DocAI API.
