

Feature overview The Microsoft 365 Learning Platform

Build and manage courses

Course creation wizard	
Learning paths	©
Libraries of ready-made courses	©
Course categories and tags	©
Mandatory training	©
Due date and expiration settings	©
Course completion parameters	©
Course and learning module prerequisites	©
Certificates and skills for course completion	©
Course cloning	©
Al-assisted course creation	Upcoming

Build and manage content

Learning module builder	
Drag and drop to organize course content	•
File storage via Microsoft SharePoint	&

Learning formats

Classroom courses with integrated room booking	
Virtual instructor-led training	&
On-demand eLearning	
Blended learning	&

Content formats

Documents (PDF, PowerPoint, Word, Excel, etc.)	
Audio	S
Video	S
iFrame	S
Formatted content	S
Website link	S
LTI 1.1 support	
SCORM	S
AICC	⊘
xAPI	Ø

Assessments

Assessment of learners by supervisor	©
Attendance tracking	&
Test and quiz builder including 9 question types and advanced settings	&
Question pool builder	Ø
Course rating	&
Survey builder via Microsoft Forms	&

Gamification

Levels to progress to the next stage	©
Points	&
Leaderboard	&
Personal learning progress dashboard	Ø

Course enrollment and discovery

Search-driven course catalog	Ø
Allow self-subscribe of courses	O
Auto allocate courses	&
Assign courses to Microsoft 365 and Azure Active Directory groups	&
Waiting lists and enrollment flows	&
Al-powered course recommendations	Upcoming

Learner experience

&

Notifications

Import user transcripts

Purge users

Notifications	
Automated notification flows	
55 customizable notification templates	&
Email, in-app, and Microsoft Teams notifications	©
Skills management	
Define skills	Ø
Define skill levels	Ø
Associate skills with courses	&
Manually assign skills	Ø
