

CitiusTech: PERFORM+ Contracts

Get unmatched oversight across all your contracts and performance measures

PERFORM+ Contracts is part of CitiusTech's PERFORM+ suite of products with a focus on creating a centralized mechanism to manage provider performance, goals and incentives across multiple quality programs. The solution helps provider relations, network management and strategic advisory teams to define, monitor and prioritize various types of provider improvement programs, including value-based, regulatory or contractual relationships.

PERFORM+ Contracts enables health plans and providers to manage all their contracts, processes and performance measures in a single unified platform. It provides AI/ML powered actionable insights to drive collaboration, lower provider abrasion and improve performance of value-based programs.

PERFORM+ Contracts: Solution Components

Key Highlights

- Single, consolidated view of all programs for each provider
- Out-of-the-box features for integration, analytics, patient attribution & provider hierarchy
- Multiple programs managed on centralized solution
- Self-service tools to drive improvements independently

Organizational Outcomes

- Reduced Cost
- Improve Quality Outcomes
- Maximize Revenues
- Align contracts

Program Setup: Highly configurable module that enables network management teams to implement the management framework as a program.

Performance Analytics: Pre-built, customizable dashboards and scorecards to analyze provider performance across multiple parameters and utilize findings in future programs

Stakeholder Engagement: Scorecards, prioritized task lists, provider self-service capabilities and configurable workflows -to improve payer-provider engagement

Key Use Cases:

- Provider/Network Management:
- Provider referral (Quality and Transparency)
- Clinical and Operational (Predictive) Analytics, Patient Insights Analytics
- Population Health Analytics
- Bundled Payments, VBC, Episodic Care and Contract Management
- Financial & Operational Analytics
