

UST Walk-In, Walk-Out :

**SOLUTION FOR RETAIL & CONVENIENCE STORES,
AND CAFETERIAS**

Replace long checkout lines and cart abandonment with a seamless shopping experience that allows customers to walk into a store, grab their items and walk right back out

Shoppers start the app on a smartphone and enter the store.

Shoppers simply walk out with their goods — no waiting in line required.

Smart in-store technology tracks them through the store, recording what they pick up and put back.

A few minutes later, the customer receives a receipt with a list of purchased items.

The total Walk-In, Walk-Out solution

Site Survey

There from the beginning to make decisions with you about site details
