- Automate cumbersome administration
- Serve multiple customers on a single platform
- Deliver valuable new services that more than pay for themselves

Optimize Your Cloud

Deliver up to 65% monthly savings

Our optimization platform is designed specifically for MSPs and two-tier distribution. We provide the only 100% channel automated cost optimization SaaS platform in the market.

Kalibr8 use AI and Machine Learning techniques, our platform implements ongoing policies to optimize cloud growth while reducing waste. Our market leading illum8™ data analytics and actionable insights capabilities are making it easier to automatically reduce spend without giving up on quality through innovations including monitoring, scheduling, and generally optimizing Azure investments.

MSPs must adapt to a completely new way of procuring IT infrastructure, moving from predictable upfront capital expenditure to variable consumption-based monthly bills and new procurement workflows from the growing number of B2B cloud marketplaces.
