

Streamline and optimize your IT landscape

Unisys Application Assessment

Highlights

- Enhanced business agility and collaboration with stakeholders to better understand business outcomes
- Expert-led workshops with persona-based business outcomes and a defined process
- Identification of the lifecycle stage of each application and exploration of interdependencies between business projects and supporting applications
- Optimized resources and processes to swiftly adapt to market changes
- Reduced licensing fees, maintenance costs and infrastructure expenses

As your organization adjusts to dynamic market demands, the number of applications under your management continues to increase, resulting in a complex network of systems. This complexity introduces inefficiencies, elevated costs and heightened security risks. As an IT leader, the limited visibility and control over this multifaceted application landscape directly hinders your ability to make informed decisions and optimize resources effectively.

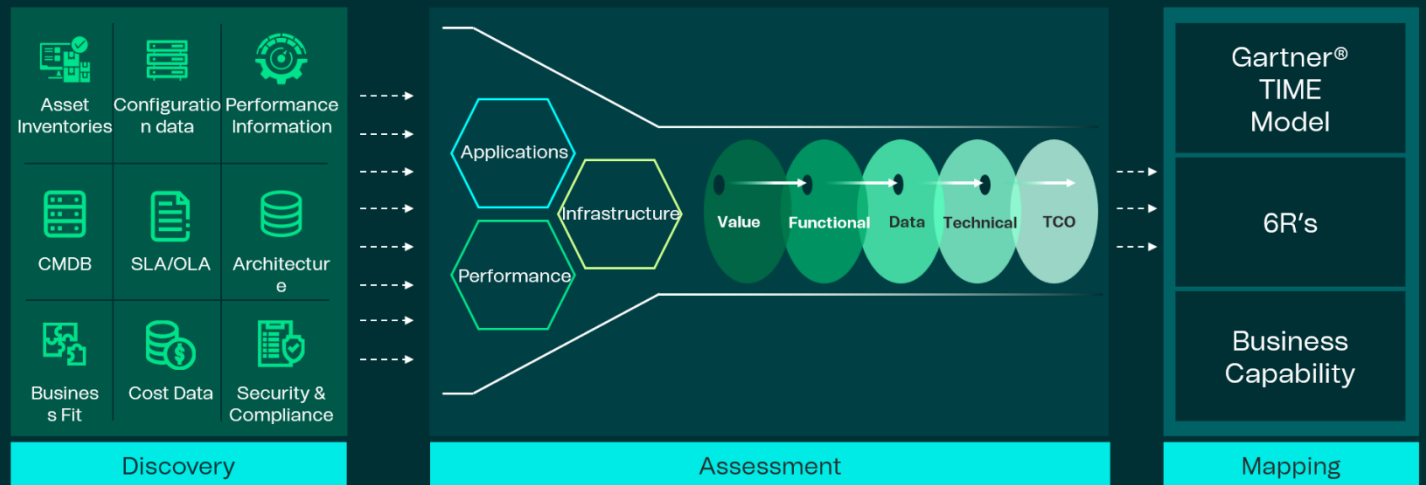

The Application Assessment solution strategically aligns your IT investments with business objectives, driving innovation.

Our comprehensive solution delves into the intricacies of your application portfolio, utilizing advanced technology and expert-led workshops to craft optimization strategies.

How do you benefit?

- **Reduced costs:** Lower IT spending by eliminating redundant and outdated applications to minimize licensing, maintenance and support expenses
- **Simplified operations:** Streamline your IT landscape for easier management, enhanced security and seamless updates
- **Fortified security:** Shield your organizations from cyber threats and effectively manage security risks
- **Enhanced compliance:** Streamline your application landscape reducing the number of systems requiring audits and ensuring regulatory adherence
- **Elevated user experience:** Integrate your applications for a cohesive environment, minimizing the need for users to switch between systems
- **Improved data quality and integration:** Centralize your applications to eliminate data silos and ensure consistency across systems
- **Amplified performance and business agility:** Boost the efficiency of your IT portfolio to align with broader organizational objectives

Unisys Application Assessment – Process Overview

The assessment delivers a comprehensive analysis of your IT ecosystem, granting visibility and control over every application in your landscape. By identifying hidden cost drivers, potential security risks and opportunities to streamline operations, this assessment sets the stage for a strategic transformation. Leveraging advanced technology and expert-led workshops, the [Unisys Application Transformation](#) solution maximizes these insights to optimize your application portfolio, align IT investments with business objectives and drive innovation effectively.
